

Personal Enrichment Projects

Name: _____ Date: _____

Goal 1 - Botanist Award:

This goal/project should stretch you. You should plan to devote extra time to this goal beyond what we are doing in class. This project demands more of you than the baseline assignments, but isn't as big or as deep or as lengthy as Goal 2. Please describe your goal below. When you have reached your goal/finished your project, please turn in a reaction paper explaining what you did and learned from the experience. (There are a variety of awards to choose from associated with this goal.)

Goal 2 - Ecologist Award:

This goal/project should really make you reach. This should take more time and effort than your Goal 1 project, but not be impossible. This can be a continuation of your first goal (for example, if your first goal was to read 5 extra books/write reaction papers, but you'd like to continue, this goal can be to read 5 MORE extra books/write reaction papers) or it can be something completely different. Please describe your goal below. When you have reached your goal/finished your project, please turn in a reaction paper explaining what you did and learned from the experience. (There are a variety of awards to choose from associated with this goal.)
