EFT and Expense Entry in LCR

The new expense module within Leader and Clerk Resources (LCR) is now available and provides the following enhancements:

- Expense entry is now done through LCR, not MLS. MLS will soon be turned off completely.
- Allows Church members to receive reimbursements electronically through electronic fund transfers (EFT). Church members may enter their banking information and authorize EFT transfers using the Online Donation tool.
- Allows leaders and clerks to upload digital receipt images. Digital receipt images can then be electronically approved. Approval will be retained in the system.
- Provides the bishop a new dashboard where he should electronically review and approve all payments.
