Canadian Six-A-Side Tackle Football Offensive Playbook

Created By – Brian Guebert

For – Saskatoon Minor Football: Six-A-Side Tackle Football League ©

30 Series

- 30 designates that the Tailback is receiving the ball
- QB reverse pivot on all players (opens away from Tailback's initial direction)
- Man blocking schemes
- **Lead** – Fullback is the lead blocker
- **Counter** – tells the Tailback that there is a change of direction and a pull blocker from the line
- **Toss** – Tailback receives a pitch from the QB
- **Pro** – A prefix to designate a play action pass

40 Series

- 40 designates that the Tailback is receiving the ball
- QB open pivots to play
- Zone blocking scheme
- **Lead** – Fullback is the lead blocker
- **Bob** – Fullback/Slotback blocks the backside of the play
- **Pro** – A prefix to designate play action

10 Series

- QB is running the ball
- **Power** – Backs are the lead blocker
- **End Around** – End receives a handoff and goes in the opposite direction of the play

20 Series

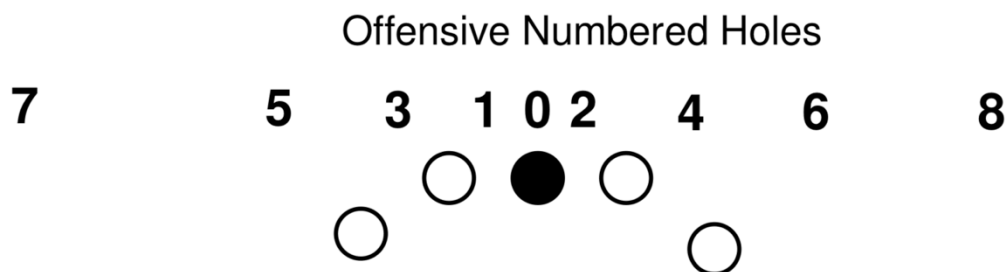

- Fullback is running the ball
- **Split Dive** – Tailback goes to the 3 or 4 holes on the opposite side of the Fullback

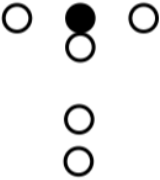

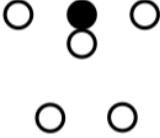

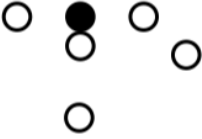

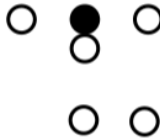

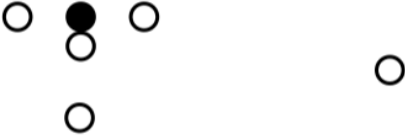

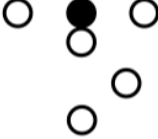

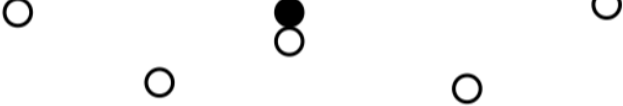

50 Protection

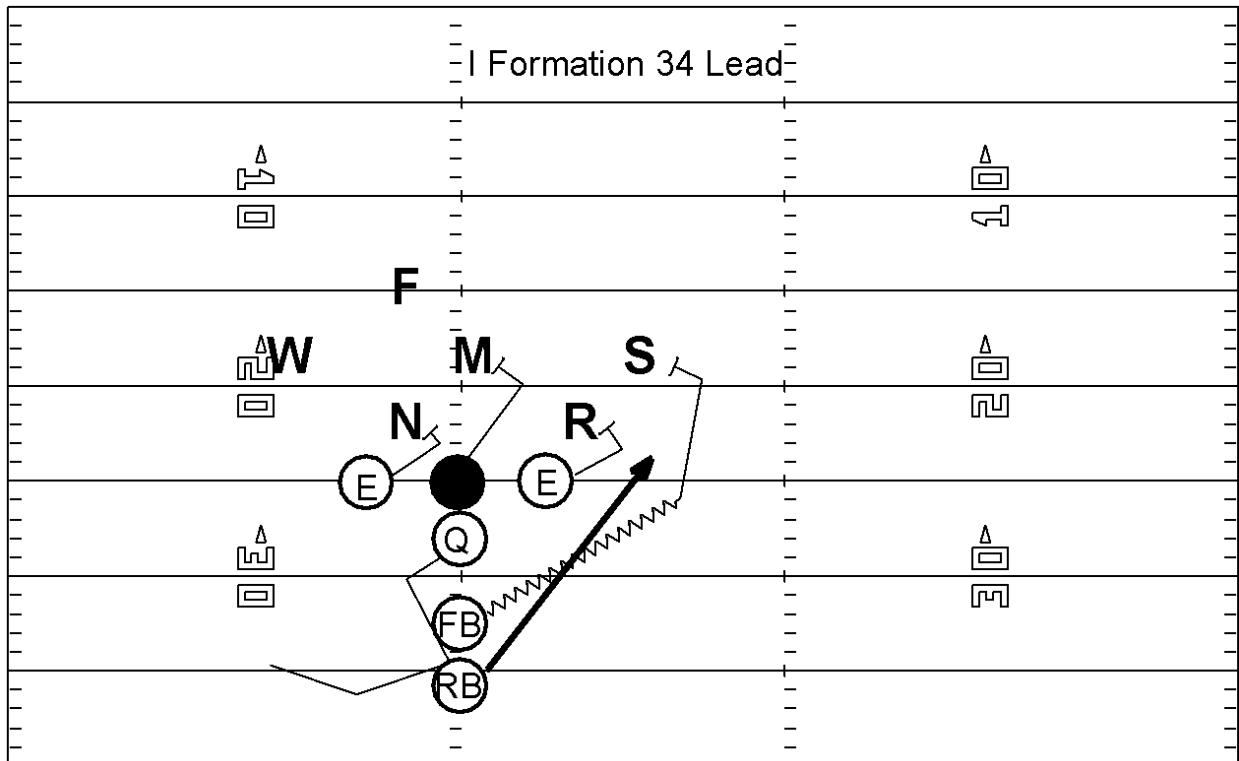

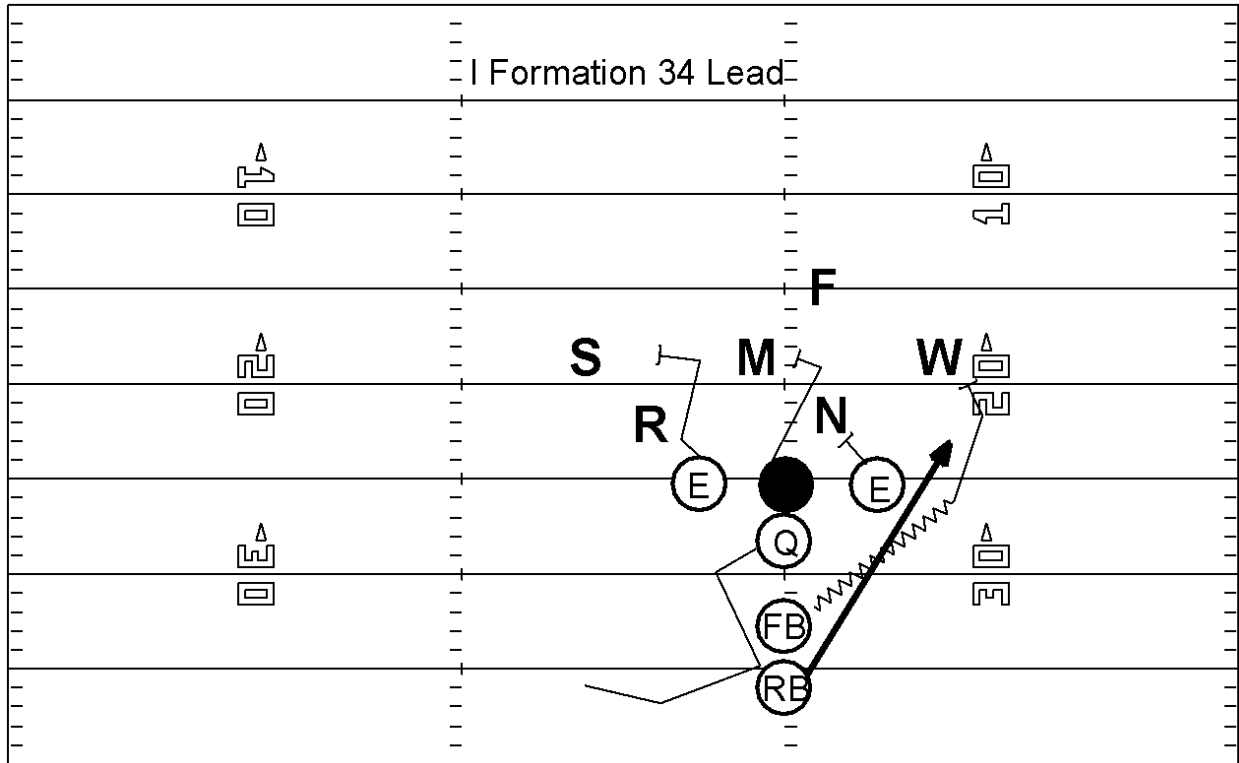

- 3-man protection (usually 3-linemen, unless an End is put into pattern)
- Patterns are given to the field strength from closest to the QB to the furthest, followed by the weak side
- Allow free pressure player to come from call side (i.e. 51 protection – ensures that the right side is blocked and the QB can see the pressure player)
- **50/51 Protection** designates a drop back pass
- **58/59 Protection** designates a roll out

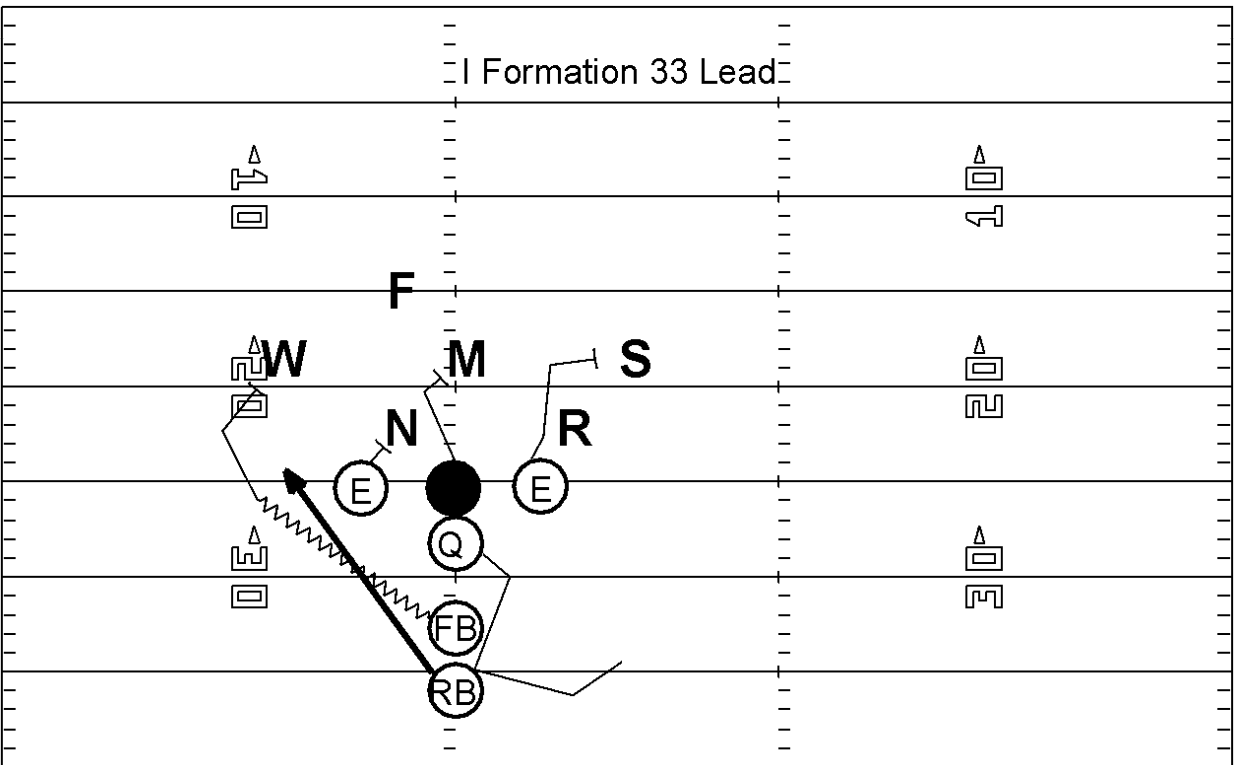

60 Protection

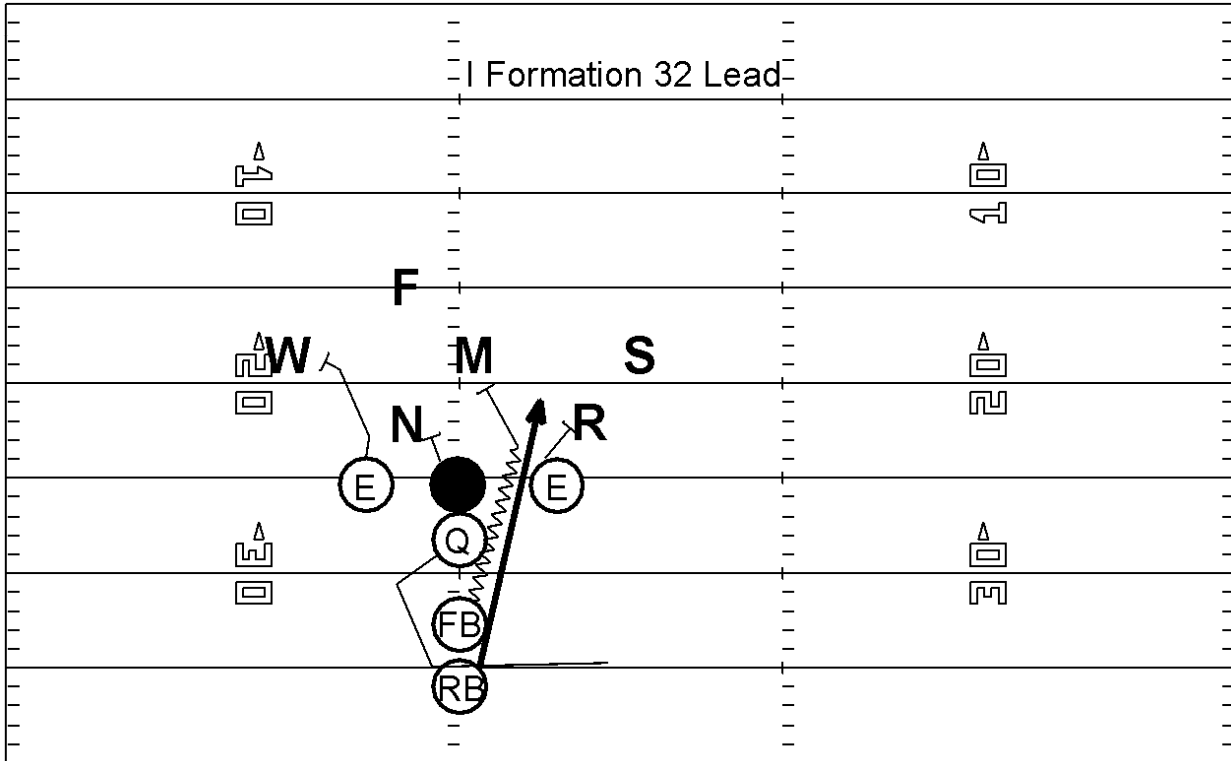

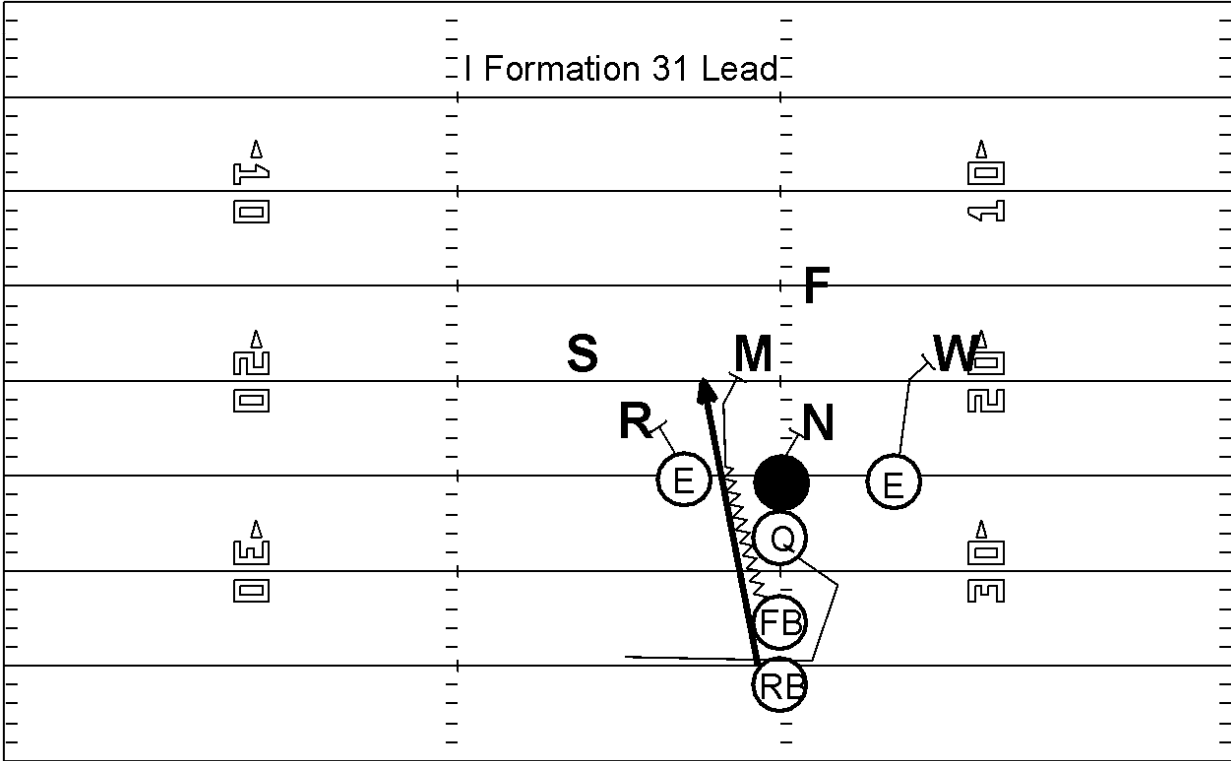

- 4-man protection (usually 3-linemen, unless and End is put into pattern)
- Patterns are given to the field strength from closest to the QB to the furthest, followed by the weak side
- Allow free pressure player to come from call side (i.e. 51 protection – ensures that the right side is blocked and the QB can see the pressure player)
- The Tailback blocks away from the call, protecting the QB's blind side
- If Fullback is in protection and the End is in pattern, Fullback replaces the End
- **60/61 Protection** designates a drop back pass
- **68/69 Protection** designates a roll out

Slot Left Ace Pro 43 Shovel Drag

The diagram illustrates the Slot Left Ace Pro 43 Shovel Drag. It features a central black circle with several lines radiating from it to various points labeled with letters: S, M, N, E, Q, FB, and RB. A solid line with an arrow points from S to F, and another solid line with an arrow points from FB to Q. A dashed line with an arrow points from F to W. A dashed line with an arrow points from RB to the bottom right. On the left side, there are three vertical dashed lines, each with a small triangle pointing up. On the right side, there are three vertical dashed lines, each with a small triangle pointing down. The diagram is set against a background of horizontal lines with tick marks.

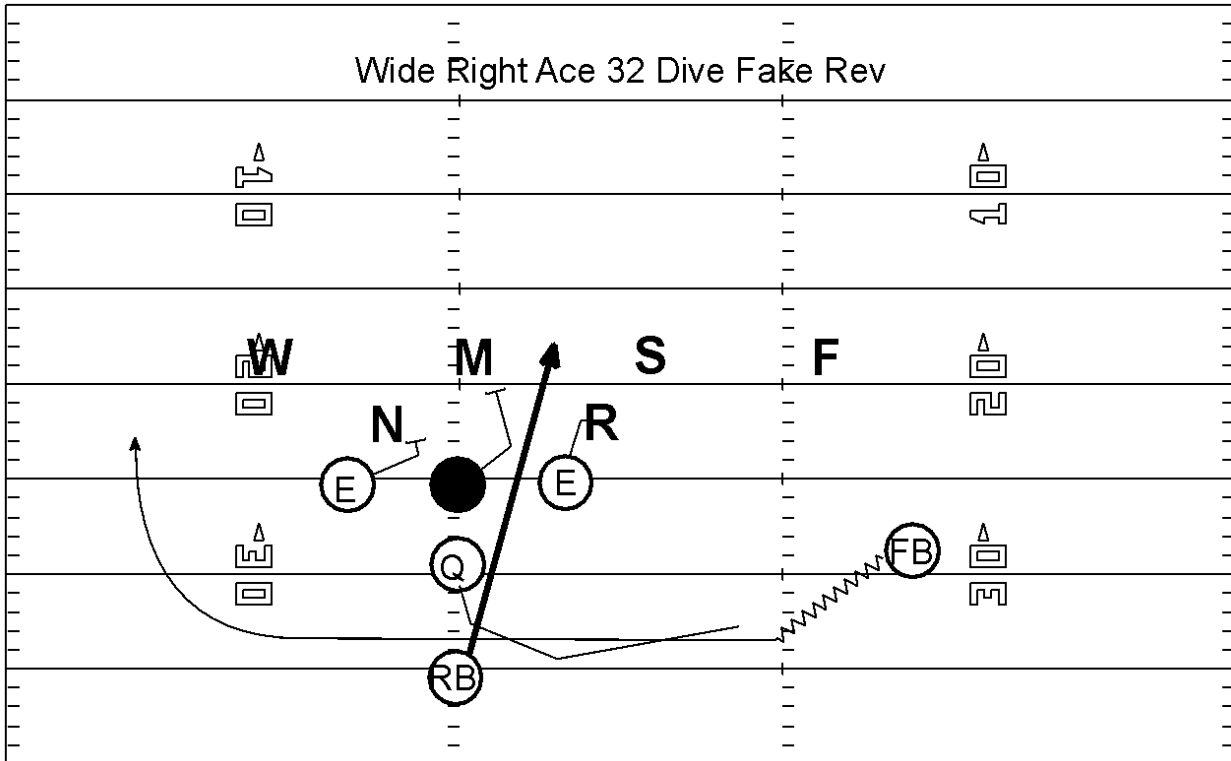

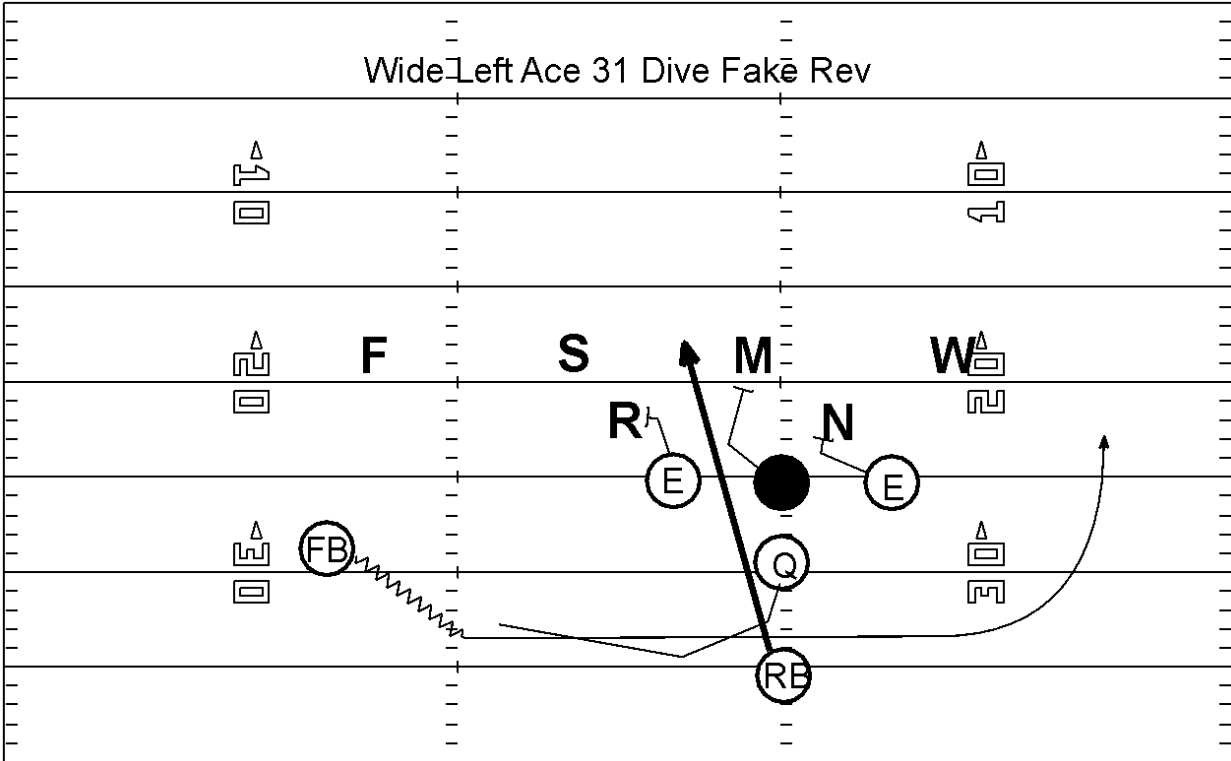

Slot Left Ace Pro 43 Shovel Drag

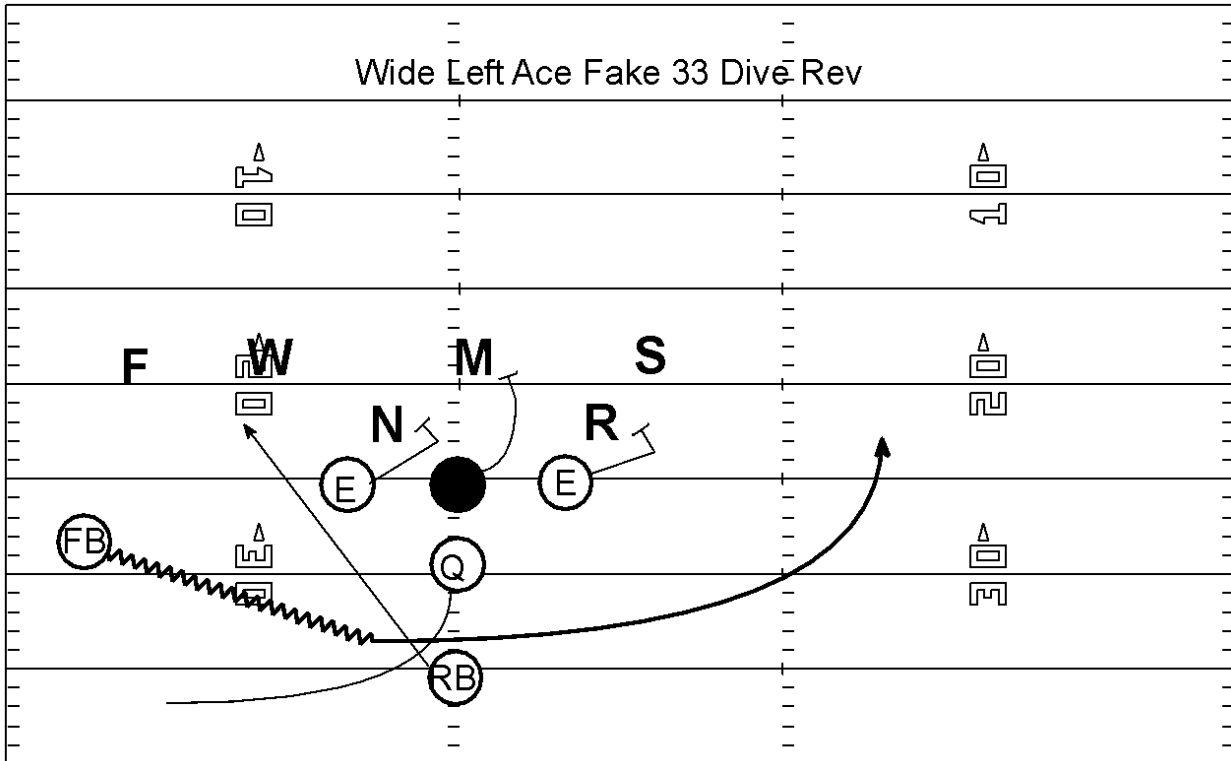

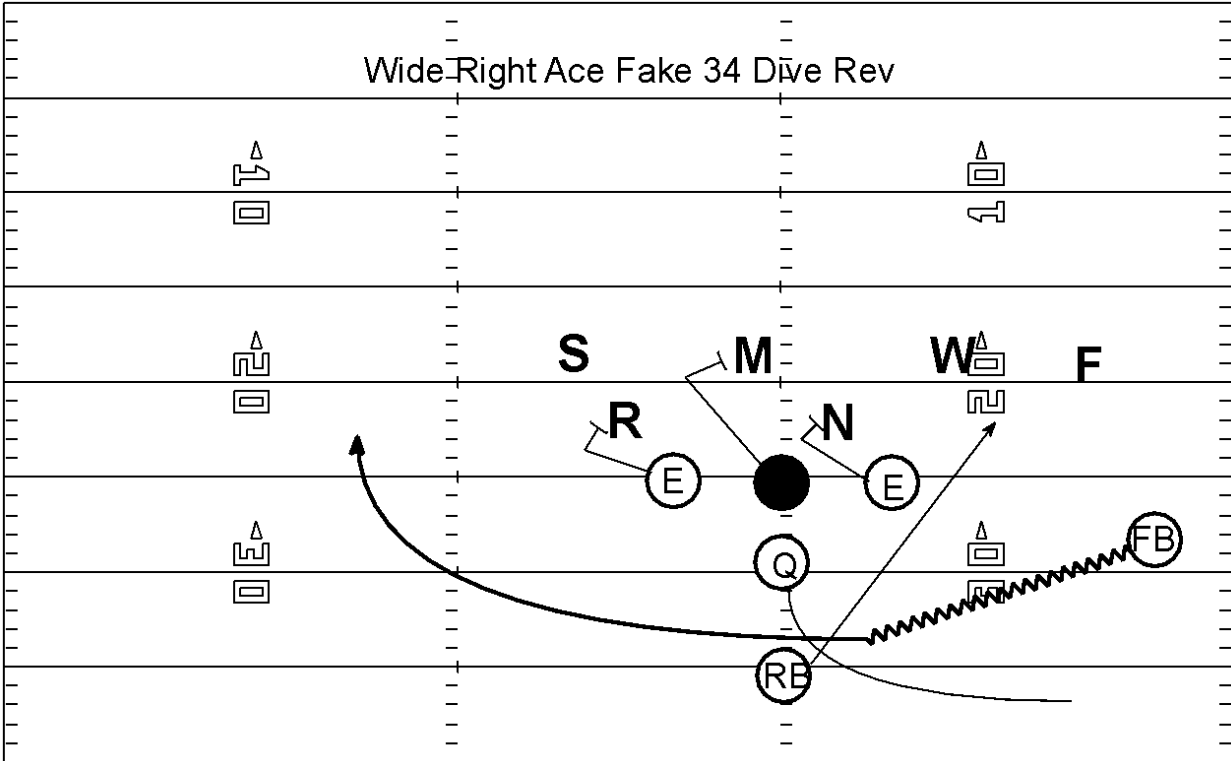

The diagram illustrates the shovel drag technique for the Slot Left Ace Pro 43. It shows a central black dot representing the shovel head, with various points labeled: F (top left), S (top right), M (middle left), N (middle right), E (bottom left), Q (bottom center), RB (bottom right), and FB (bottom right). Arrows indicate the direction of movement, showing a path from F to S, then down to M, then to N, then to E, then to Q, then to RB, and finally to FB. A dashed line connects F and E, and another dashed line connects M and N.
