Predictable Options in the Learning Environment
What options in the learning environment **reduce barriers** and are **consistently available** to all learners?

Multiple Means of Engagement: Design Options for…	**Current Options**	**Options to Add**
Welcoming interests Examples: Goals are shared in the digital classroom and reviewed in every lesson with success criteria… In addition to the teacher's goals, it is expected that learners write their own goals for major projects and assignments. Tech An optional 15 minute informal video conference chat happens every morning before school. Topics include sports, weather, news , etc.		

Sustaining effort and persistence Examples: The teacher holds virtual office hours every morning and every afternoon. Attendance is optional. The teacher provides timely mastery-oriented feedback on all assignments.		
Emotional Capacity Examples: Learners self-assess their wellness each week using a digital survey and schedule 1-1 meetings with the teacher when needed. Choosing to take a 5-minute learning break with the **virtual calming room website** is always an		

option. 3-minutes of silent reflection time is built into every lesson. Learners can count on it.		

Multiple Means of Representation: Design Options for…	**Current Options**	**Options to Add**
Perception Examples: All educational materials are provided digitally, but paper copies are available. All video content has closed captions and transcripts are provided.		

Understanding language and symbols Examples: The definition of new vocabulary is always hyperlinked in digital documents. Photographs of relevant classroom anchor charts are pasted onto assignment documents. For example, the writing process visual process is on the bulletin board for reference		
Building Knowledge Examples: Digital or paper graphic organizers are always available when students are “taking notes” from a text or video. When watching, reading or hearing new content, learners always have a shared Google doc for asking questions and responding to		

comprehension prompts.		

Multiple Means of Action and Expression: Design Options for…		
Interaction Examples: It is a school policy that all learning materials be operable with assistive technology. Learners can choose to speak aloud or to write in a Chat box when participating in video conference class discussions.		
Expression and communication Examples: There is always a choice of activities for practicing skills and projects for demonstrating understanding. When learning new skills,		

the lesson always includes a “We Do” before a “You Do”. Guided practice is a norm with feedback.		
Strategy Development Examples: A calendar of assignments with due dates and benchmark completion dates is provided with every assignment. Every assignment has some type of progress monitoring tool for learners to use. Learners can count on this.
