

LETHAL TEMPO

A League of Legends-themed chorus group

GENERAL

Hello, and thank you for your interest in **LETHAL TEMPO**! We are a permanent cover group singing primarily in Japanese themed after the world and characters of the game **League of Legends**! Our vocalists and staff are represented by different champions from the game rather than personas, but we plan to cover a wide variety of songs! The schedule for this group will be flexible, especially considering current circumstances, but we ask that you please do your best to make sure you will be able to commit to this group before auditioning! Thank you!

ROLES OPEN

VOCALS- Currently, we plan to have **eight** vocalists with ranges in the **soprano, mezzo-soprano, and alto registers** in the group. This number may change based on the amount of auditions received. Due to the vast number of characters available, we have not set specific champions to audition for- rather, auditionees can choose which characters interest them most!

EDIT: Due to interest, **all vocal ranges may audition- not just soprano through alto!**

If you are interested in a vocal role, we have listed some potential champions and advised voice parts at the bottom of this document. **You do not need to follow these recommendations!** When applying for a vocalist position, you will be asked to provide your voice type, as well as up to five characters you would be interested in portraying! We will work with all our vocalists to make sure they sing as a champion they like!

STAFF- For staff positions, we are searching for mixers (time/tune/mastering), artists, animators, and guide makers.

At the moment, we do not have a limit to the amount of staff members we will be casting. Staff members will also be portrayed by a champion of their choosing!

AUDITION REQUIREMENTS

[Link to audition here!](#)- if applying through DM, use template at the bottom of this doc!

1. You may submit your audition either through the Google Forms provided or through DM to LexC (TW: @lexcva, Discord: LexC #4599)
2. You must submit at least **two** samples of your work for whatever role you apply for (ex: two examples of tracks you mixed, two vocal samples).
 - a. If you are auditioning for vocals, at least **one** of your samples must be in Japanese!
 - b. You may submit chorus battle entries/collabs as samples, but you must provide timestamps or clear indication of which parts of the entry are composed of your voice/work!
3. If you are auditioning for the role of vocalist, please make sure your samples reflect your recording capabilities (little/no background noise, good mic etc.)
4. Have Discord! Discord will be our main form of communication as a group, so we ask that you please create an account before auditioning if you do not already have one.
5. Be respectful! Rudeness, discrimination, and disrespect will not be tolerated within our group. Violations of this requirement will disqualify you from auditions, or potentially lead to your removal from the group.

Notes:

- Depending on the amount of auditions we receive for each role, vocalists who can double as staff members may be prioritized. If you are interested in a vocal role and feel comfortable auditioning for a staff position as well, we encourage you to do so!
- You do not need to play League of Legends in order to audition for this group! However, we ask that you are at least somewhat familiar with the lore/characters!
