

SPEAKER 1

I don't know why this disease worries so many people. I've said it thousands of times in my Harvard classes. Type 2 diabetes has had a cure for over 2000 years. Actually, the complete recipe is written in a book you probably have at home, the Bible. Anyone can treat the disease at home if they make the recipe correctly. The problem is that most people don't know about this because for years this recipe has been kept hidden. But I'll do this. I'm going to put here the interview with Dr. Sullivan who spoke openly about all the details of this biblical recipe that controls sugar spikes and treats type 2 diabetes definitively and 100% naturally.

SPEAKER 2

What I'm holding is the biblical drink capable of curing type 2 diabetes. The recipe for this drink is explicitly written in the Bible. But these sacred pages were stripped from us by a billion dollar industry that profits from your suffering. Sounds unbelievable. This was proven by an American doctor who was able to decipher 2000 year old manuscripts that revealed this biblical drink so powerful that it allowed the followers of Moses and the disciples of Jesus to live beyond a hundred years without diabetes or any chronic disease. A simple drink mentioned over 30 times in the sacred scriptures, made of four special ingredients that attack the true cause of type 2 diabetes. Why have you never heard of this biblical cure before? The answer is as simple as it is shocking. The \$327 billion pharmaceutical industry has done everything to keep this knowledge buried. Because while you continue suffering from type 2 diabetes, they profit an average of \$16,752 per year with each diabetic patient in the United States. Today on the American Health Report, we are going to reveal what could be the greatest medical revelation of the second. And by our side

is the man who deciphered this ancient biblical wisdom and became the pharmaceutical industry's greatest nightmare. Director of the National Institute of Diabetes. President of the American Society of regenerative medicine. His TED talks have been viewed by over 27 million people. Graduated with honors from Harvard, awarded by Johns Hopkins. His work earned him the prestigious Harold Ham Diabetes Research Award, an award reserved only for those who make discoveries that revolutionize global health.

SPEAKER 3

Thank you, Kate. It's a pleasure to be here. Today I'm going to expose the whole truth to everyone at home. I will show that everything we've known so far about type 2 diabetes is nothing but a lie. The industry has been deceiving us all this time. That's why defeating the disease has always been considered impossible. They have always told us that it's all about genetics. Age, sugar, carbohydrates. But the truth is, it's not. If that were true, all elderly people would have diabetes. Genetics even less so, because decades ago, diabetes was a rare condition. Sugar and carbohydrates. A diet would have solved it, but we know that's not what happens. And all they do is sell us these expensive chemical drugs that do nothing.

SPEAKER 2

But in that case, then what truly leads to diabetes, Doctor?

SPEAKER 3

A deadly bacteria that feeds on the pancreas, preventing it from producing insulin naturally, leading to insulin resistance and eventually high blood sugar spikes. And diabetes. Since no one

ever knew this before, diabetes was always considered incurable. Until now. Because thanks to this discovery, I have been able to reverse More than 13,000 cases of type 2 diabetes in America completely naturally. All documented and published in the most respected medical journals like Lancet and New England Journal of Medicine. Proving that this diabetic bacteria is the true cause of type 2 diabetes. And that this simple biblical drink not only is capable of ending the blood sugar spikes, reversing type 2 diabetes, but it also reverses all the damage caused by the disease as if they were true miracles on earth. And look for you at home. It might seem hard to believe, but I'm not asking you to trust me. Just watch the program, because I will prove, here and now, with irrefutable scientific evidence, photos and videos of everything I am saying. And if you stay with us until the end of the program, you'll discover the four sacred ingredients mentioned repeatedly in the Bible that eliminate the diabetic bacteria. How to prepare this biblical drink in the exact proportion in your own kitchen to reverse the damage caused by the disease, why dieting and cutting carbohydrates can make your diabetes worse, and why this discovery is causing panic in the world's largest pharmaceutical companies.

SPEAKER 2

Dr. Sullivan, this is truly impressive, but before we begin, I noticed you brought those sunglasses. They look a little vintage. What are they for?

SPEAKER 3

So these glasses were my father's. Sorry, it's still hard for me to talk about this. These glasses were my father's. He used them when he was going blind because of diabetes. You know, Kate,

people know me by the titles, by the awards, but nothing compares to the moment I saw my father take off these glasses for the last time.

SPEAKER 2

Dr. Sullivan, this is emotional, but how exactly did you reverse diabetic blindness? Is that. Is that really possible?

SPEAKER 3

Well, yes, it's possible. And I documented all of it. And he became the only case of complete reversal of diabetic blindness. Since then, his blood sugar has always remained below 98 milligrams per deciliter. The best part is he didn't need medication. All he did was drink a biblical drink before going to sleep. And after him, I also saw over 13,000 people become former diabetics by making this biblical drink at home.

SPEAKER 2

So this is a revolutionary breakthrough in modern medicine. And is he here today? Your father? Would it be possible to hear this extraordinary story from him personally?

SPEAKER 3

Yes, Kate. He's over there. Dad, could you join us?

SPEAKER 4

Hello, everyone. To be honest, I'm not very good at speaking in front of cameras, but I'll do my best. Well, I confess that was the hardest part, was receiving the diabetes diagnosis. It felt like a

real punch in the stomach. I started doing restrictive diets. I hated it, especially because I always saw my family enjoying delicious meals. The medications my wife and I saved for 15 years to buy our house. But the medications ate that money up in a heartbeat. But the worst part was having to disappoint my grandson, Tommy. He's only six, and every Sunday, he'd come running with something new. A cupcake his mom made chocolate he got at school. How do you look at your grandson in the eyes and say no? So I accepted it. Then I would run to the bathroom, embarrassed, and inject insulin in secret. I would lock myself in there, trembling and praying that my sugar wouldn't go too high. And I always ask myself, will I be here when Tommy graduates?

SPEAKER 3

When I.

SPEAKER 4

While I see the birth of a future granddaughter?

SPEAKER 2

Mr. Sullivan. James. This is terrible. As a mother and grandmother, I am so sorry for your pain. Especially when you talk about Tommy. This disease affects not only you, but your entire family. But Something intrigues me. Dr. Richard, you mentioned you lost your vision. How did that happen?

SPEAKER 4

Okay, it was one morning at the cab, and I'll never forget it. Since he was little, I used to take Richard hunting, just like my

father did with me. And now it was time for my grandson. But that morning, something happened. Damn it. I can't see. Where is it? I shouted, lowering my rifle. Everything was blurry. Richard noticed immediately. I saw the terror in his eyes. My own son, respected doctor, completely terrified. What should have been a day of happy memories turned to a frantic race to the hospital. Richard drove like a maniac. Me in the passenger seat trying to stay calm. And my little grandson in the backseat, crying, not understanding what was happening to Grandpa. When we arrived at the hospital, my blood Sugar was at 360.

SPEAKER 3

Allow me to continue this part. Dad. Kate. As a doctor, I had given thousands of diagnoses, but nothing, nothing prepared Me for that moment. The doctor looked at my father and said coldly, there's not much we can do, Dr. Richard, he's going to go blind. I know you're a busy doctor. It's better to look for a specialized nursing home. A nursing home for my father, who survived three years in the jungles of Vietnam. Who saved 12 comrades in a Viet Cong ambush. Who worked for 40 years without missing a single day. He was only 63 years old, for God's sake. At that moment, something broke inside me. I felt disgusted by the medical system in our country. I looked at my father, the hero, and said, I won't give up on you, dad.

SPEAKER 2

My God, what a terrible moment for the both of you.

SPEAKER 3

Thank you, dad. You can go back now.

SPEAKER 4

Nice meeting you all. Take care.

SPEAKER 2

Doc. But what happened since then? Did that anger turn into some kind of motivation? Was that what led to the revolutionary discovery that cured your father?

SPEAKER 3

Exactly, Kate. For months I became obsessed. I spent sleepless nights, forgot what it was like to sleep. I studied everything you can imagine in search of hope. Every morning was torture. I woke up terrified of getting that call that my father had completely lost his sight. You can't imagine what it's like to see your hero stumbling around the house, knocking things over, trying to hide the fear in his eyes of going blind. My hopes were dying. I almost gave up. Until one night, God showed me something incredible. An Israeli archaeologists had discovered a sacred scroll near the Dead Sea that would change everything. It was the Book of Cures of Moses. That was the same book used by the disciples of Jesus to heal the sick wherever they went. And that's when I finally discovered something that shocked the entire medical community. The true cause of type 2 diabetes. And I understood why nothing modern medicine tried had worked for my father.

SPEAKER 2

The true cause. You mean to say that everything we know about diabetes is wrong?

SPEAKER 3

Yes, Kate. For years we believed that diabetes was caused by genetics, lifestyle, and of course, excess sugar and carbohydrates. And we weren't entirely wrong after all. Any diabetic knows that if they eat something sweet, their blood sugar will spike. However, there's something much deeper going on. Something that attacks your pancreas and prevents it from producing insulin, making you diabetic. This explains why some people can eat sweets their whole lives and never develop diabetes, while others, even following the strictest diet in the world, keep seeing their sugar levels rising uncontrollably.

SPEAKER 2

Wow. You know, I'd never thought about that. That's shocking. Could you give us more details about it?

SPEAKER 3

Sure. I'll explain everything in detail. You at home, pay close attention to what I'm about to say, alright? Because? Because this goes against everything you've ever heard about type 2 diabetes. And it answers why you've never been able to get rid of the disease, no matter how hard you've tried. Hey, you've probably heard that the gut is called our second brain, right?

SPEAKER 2

Yeah, but I don't know why it's called that. I mean, that's crazy.

SPEAKER 3

So let me explain. See, unlike any other organ, the gut can function without direct commands from the brain. That's because it houses about 100 trillion bacteria. And these bacteria control the gut and the health of our body. Now, these bacteria are divided into two. Good bacteria and bad bacteria. Good bacteria help us digest food and absorb nutrients, but bad bacteria cause problems for our health. For example, the H. Pylori bacteria, which is linked to gastritis. Now, what shocked the scientific community was the discovery of a specific bacteria that has been proven to lead to type 2 diabetes.

SPEAKER 2

A bacteria? Really? That's shocking.

SPEAKER 3

Exactly, Kate. And this discovery came from a study led by Dr. Christopher Gardner at the University of Stanford. And now he's being considered for a Nobel Prize in medicine because he was able to prove that this bacteria is truly the cause of type 2 diabetes.

SPEAKER 2

That's amazing. But how did he discover that?

SPEAKER 3

It all started when Dr. Gardner met Gene and Janet, identical twins. But although they have exactly the same genes and lifestyle, Janet is completely healthy, while Gene suffers from type 2 diabetes. So he decided to closely analyze the bodies of twins. So he led a study with doctors and scientists examining

the lives of 2,000 twins, analyzing their environment, stress levels and everything else to understand why, even though they have identical genes, some developed type 2 diabetes and the other didn't. Their goal was if they could figure out why one twin developed diabetes while the other did not, they would be closer to uncovering the true cause of type 2 diabetes. And it was then, after nine months, that they discovered something sensational. Well, simply put, the twins who developed type 2 diabetes had harmful bacteria in their gut that attacks the pancreas and blocks insulin production. This keeps glucose levels constantly high, leading to type 2 diabetes. That's why it's called the diabetic bacteria.

SPEAKER 2

That's terrifying. I mean, I knew gut health was important, but I never imagined this. Could you explain to us a little more?

SPEAKER 3

Of course. Look, this diabetic bacteria primarily feeds on glucose. So the more sugar and carbohydrates you consume, the more this bacteria grows. And, well, it's no secret to anyone that we've been consuming more and more sugar. In the past 50 years, our sugar intake has increased dramatically about 300%. This excess glucose causes this bacteria to multiply rapidly. And when that happens, well, that's when the story turns into a horror mood.

SPEAKER 2

And what happens when this bacteria multiplies?

SPEAKER 3

Well, something terrible. It damages the intestinal walls, creating cracks that scientists call leaky gut. It's through these cracks that the bacteria escapes into your bloodstream, where it finds a real feast of glucose. And once in the blood, it acts like rust, corroding your body from the inside out, starting with the pancreas. It attacks the beta cells of the pancreas, which are primarily responsible for insulin production. And once your pancreas is being attacked, well, two things can happen. First, you produce less insulin, and second, you produce low quality insulin. Either way. What? Whether it's scenario one or two, you will enter what we doctors call insulin resistance. That means your body can't use insulin, effectively causing your glucose levels to spike. That's why it doesn't matter if you're dieting or taking your medications religiously, because as long as the diabetic bacteria is attacking your pancreas, you will have insulin resistance and your sugar will always be high. This is the simple truth about type 2 diabetes that the pharmaceutical industry doesn't want you to discover. It's not your genetics, it's not sugar or carbs, but rather this diabetic bacteria that is spreading throughout your body.

SPEAKER 2

Wow, Doc, that's horrific. Look at this. I'm getting chilled just imagining that there's a bacteria devouring our body from the inside out.

SPEAKER 3

Yes, it's horrifying. In fact, can we go to the lab to show how this bacteria attacks our body from the inside?

SPEAKER 2

Of course. Let's go.

SPEAKER 3

Here in these glasses, we're representing your bloodstream. It's basically water and glucose. Okay, now let's add a colony of diabetic bacteria so you can see what happens.

SPEAKER 2

Whoa.

SPEAKER 3

Look.

SPEAKER 2

Do you see?

SPEAKER 3

Immediately it starts multiplying. See how quickly it grows? This is how it manages to pierce your intestines and attack your pancreas, leading to type 2 diabetes. And as it multiplies, it starts attacking other parts of the body.

SPEAKER 2

This is terrible. Shocking. Doctor, in the laboratory, we could see how fast they multiply and attack our body. This is alarming.

And how can our viewers know if they have this diabetic bacteria in their body? I mean, is there a test?

SPEAKER 3

Well, there are some clear symptoms that reveal you have this diabetic bacteria in your body, you at home. Just answer yes or no to some of the symptoms I'll mention here. First, do you feel excessive tiredness and constant cravings for sweets? Well, glucose is energy, but the diabetic bacteria is consuming your glucose. In other words, there's no energy left for you. So your body starts begging for more energy, leading to uncontrollable cravings for sweets. Second, are you forgetting things in your daily life? This could be a sign that the bacteria has crossed the blood brain barrier, drastically increasing your risk of Alzheimer's, which is referred to as type 3 diabetes. Third, do you feel tingling and burning sensations in your hands or feet? This happens because the diabetic bacteria is spreading throughout your body. Be careful. This can lead to amputation. Every 30 seconds, a diabetic amputates a limb. And lastly, if your vision is worsening or if you've noticed spots in your sight, this could be a sign that the bacteria is reaching your eyes, potentially leading to blindness.

SPEAKER 2

My God, Dr. Sullivan, this is truly terrifying. And to think that millions of Americans have this bacteria devouring their bodies from the inside out right now. But what about the medications? Do they help?

SPEAKER 3

Unfortunately, no, Kate. And that's exactly the big problem. Medications like metformin and gliclazide only address the symptoms and try to lower blood sugar, but that won't help. Imagine you have a car and it's rusting. Does painting over it help? No. On the outside, it looks new, but inside, the rust is still eating away at everything. Well, it's the same with these medications. They only mask the symptoms while the diabetic bacteria continues to destroy your pancreas. That's why diabetics even taking medications every day end up amputating limbs or going blind, just like what was happening to my father.

SPEAKER 2

That's really terrible. But, doctor, is there no escaping it?

SPEAKER 3

Well, that's what the industry wants you to think, that there's no way out. But in reality, all we need to do is eliminate the diabetic bacteria from our body. Because by eliminating this diabetic bacteria, your body naturally regains control of glucose without relying on medication forever. The big problem, of course, is that it's not so simple to do that. It's not like just taking a probiotic would solve it, because in fact, a lot of them contain sugar and other ingredients that can could actually feed the bad bacteria. And even if they helped a little, they wouldn't solve the problem. They only balance the bacteria in the gut. But they don't address Those that have already spread throughout your body. That's why the only way to tackle type 2 diabetes is at its root cause freeing anyone from this devastating disease is through this biblical drink that the disciples of Jesus used to live beyond 100 years without diabetes and with enviable health.

SPEAKER 2

Please tell us more about this biblical drink. I'm curious to know more about it. And I'm sure our viewers are eager to learn how to make it at home to treat type 2 diabetes once and for all.

SPEAKER 3

Well, that's what I'm about to explain. In my search for a solution, I found an article by an archaeologist, Dr. Chanan Tige, who made an extraordinary discovery. He found Moses scrolls from 2,000 years ago, including the Book of Cures, a sacred manuscript containing natural remedies used by Moses and the disciples of Jesus, passed down directly through generations since biblical times. And in this sacred manuscript, there was a biblical drink with anti diabetic properties which Dr. Tige was about to publish. That's when three giant pharmaceutical companies offered him \$1.8 million to acquire his manuscripts and all his research on the condition that he would never speak about the matter again.

SPEAKER 2

Well, that feels like a clear attempt at making a medication and profiting off of it.

SPEAKER 3

You are absolutely right, Kate. Do you believe that after this, Dr. Tige disappeared and all his research was confiscated?

SPEAKER 2

Really?

SPEAKER 3

Yes. And just a few months later, Pfizer announced its first synthetic diabetes drug. This transformed the diabetes medication market from just \$50 million in 1963 to the colossal 78 billion it is today, according to Statista 2023. Coincidence?

SPEAKER 2

I think not. It seems like they literally did everything to keep this information a secret. But from your enthusiasm, I imagine you've managed to discover some something about this miraculous drink, haven't you?

SPEAKER 3

Yes, Kate, I did. But it wasn't easy. Through contacts in Israel and after months of researching in biblical libraries, I gained access to fragments of the original manuscripts. Now, unfortunately, because they're so old, much of the information was incomplete or deteriorated by time. But I enlisted the help of a Hebrew translator and together we deciphered a specific passage that caught our attention. And this took me to the definitive solution for type 2 diabetes.

SPEAKER 2

Tell us, Doctor, what did the passage say?

SPEAKER 3

Well, this text described what seems to be the first documented case of diabetes. It told the story of Hoglah, who during the

Exodus with Moses, suffered from terrible symptoms. Dry mouth and intense thirst, weakness, blurry vision and burning sensations in her hands and feet. The text describes how Moses, guided by divine wisdom, prepared a sacred drink using only Four ingredients and healed Hagle. For decades, Jesus disciples used this same drink to heal others wherever they went. A natural remedy that was forgotten over time or hidden from us.

SPEAKER 2

Amazing. But does it say what were the ingredients in this biblical drink?

SPEAKER 3

Yes. This piece detailed precisely the four ingredients of this biblical drink that cured hogla of type 2 diabetes. And for the first time, I felt there was a real hope to save my father. But there was a big problem. What if all of this was just an illusion? What if it didn't? As a medical specialist, I decided to investigate these sacred ingredients closely, conducting my research away from the watchful eyes of the pharmaceutical industry. And, well, I found over 200 scientific proofs about the ingredients. The first ingredient of this biblical drink is cinnamon, which is mentioned in the Bible in Exodus 30, 23, 25, where God says, Take also the finest spices. 500 shekels of liquid myrrh, half as much of aromatic cinnamon. This is not regular cinnamon. I call it sacred cinnamon because it is the only one on the planet that contains a nutrient called mhcp, which is considered the greatest antibacterial on the planet. A study conducted at the University of Copenhagen confirmed that it acts as a hunter of harmful bacteria. I brought the recording. Can we show it?

SPEAKER 2

Absolutely.

SPEAKER 3

Look. Can you see? This little black dot is the bacteria. Here is the MHCP chasing the diabetic bacteria. Notice how it ignores everything else.

SPEAKER 2

Look.

SPEAKER 3

Look at this. It chases the diabetic bacteria until it destroys it. Such precision that even our most advanced antibiotics can't achieve. Now, producers, play the other recording, please. Great. Look here you can see it more clearly. Again, these little black dots are the diabetic bacteria. Here on the side is the compound from sacred cinnamon that kills the diabetic bacteria. See? It finds the diabetic bacteria and eliminates all of them without leaving a trace, keeping you completely protected. Incredible, isn't it?

SPEAKER 2

Fantastic. It's incredible how an ingredient that's 2000 years old attacks this bacteria that we've only just discovered.

SPEAKER 3

Yes, and the best part is that a study published in the American Journal of Clinical Nutrition showed that it also strengthens the good bacteria in the gut.

SPEAKER 2

So it does double duty. Not only does it get rid of the bad, but it strengthens the good.

SPEAKER 3

But this is just the first ingredient. The second ingredient is hyssop, mentioned in Psalm 51:7, where King David cries out, purge me with hyssop and I shall be clean. And look at this incredible finding. Studies conducted at the University of Jerusalem confirmed that hyssop contains polysaccharides that imitate the action of insulin.

SPEAKER 2

So it's like a natural insulin.

SPEAKER 3

Exactly, but with one difference. Hyssop only activates glucose absorption when levels are high, preventing episodes of hypoglycemia.

SPEAKER 2

This is all so incredible.

SPEAKER 3

Yes. And the third sacred ingredient of this biblical drink is the Rose of Jericho, known in the Holy Land as the plant of Resurrection. This plant has intrigued scientists for years because even after being dead for decades, it resuscitates in a few hours after touching water. The most incredible thing is that the manuscripts report that this plant was used to heal wounds and diseases considered incurable. And medicine proves this. Researchers from Tel Aviv University followed 200 type 2 diabetics and documented impressive results. After six months of using Rose of Jericho, 87% completely eliminated neuropathic pain and 81% had significant improvement in their vision. Another study published in the Journal of Regenerative Medicine revealed that patients with diabetic ulcers that hadn't healed for over a year. After six months with the Rose of Jericho, 92% of the wounds healed completely.

SPEAKER 2

That extremely extraordinary healing power that only proves how God is perfect.

SPEAKER 3

Exactly. And lastly, the last ingredient in this biblical drink is the wild ginger, found only in the Jordan Valley where Jesus himself was baptized. To give you an idea of how powerful it is, researchers from Harvard Medical School discovered that this ginger contains incredible bioactive compounds that fight chronic inflammation. The Journal of Anti Inflammatory research documented an 87% reduction in inflammatory markers in gingerbread just six months, even improving insulin resistance and eliminating joint pain. Moreover, it also protects the nerves from the damage caused by diabetes. Scientists documented a significant improvement in symptoms such as

tingling, burning and fatigue. Even more impressive, a clinical study from Tel Aviv University showed that 190 type 2 diabetics lost on average 43.1 pounds in just six months without changing their diet or exercise. Kate. When I saw the hundreds of students scientific proofs behind the ingredients of Moses manuscript, it became clear this biblical drink was a gift from God to save my father. So I did everything I could to find the pure ingredients.

SPEAKER 2

That must have been super difficult because nowadays there's counterfeiting everywhere and that can interfere with the results, Right?

SPEAKER 3

Exactly. I mean, to be honest with you, finding them was almost impossible. The sacred cinnamon and the ginger from the Jordan Valley only grow in Israel. The Rose of Jericho is rare. The true hyssop, nearly impossible to find. It cost me a fortune. I used all my savings. My wife was desperate. Richard, this is the family savings. But I said, if there's a 1% chance of saving my father. It's worth every penny.

SPEAKER 2

Absolutely. I hear you. And then what happened? What happened when you got the ingredients?

SPEAKER 3

Kate, When I received the ingredients, I couldn't just mix everything together. I needed to extract and concentrate their

active principles without losing their healing power. That's why I had to gather a trusted team of biochemists and set up a discreet lab in Boston, away from the eyes of the pharmaceutical industry. For months, we tested different proportions, extraction methods and preservation techniques. Each ingredient needed to be processed in a specific way to preserve its bioactive compounds. There were hundreds of attempts, sleepless nights, failures and restarts. But after almost eight months of intense work, we succeeded. Instead of capsules, we decided to create a concentrated liquid formula in drops. Our idea was simple. In drops, the formula enters directly into the bloodstream, eliminating the diabetic bacteria spread throughout the body, while also regenerating organs and tissues.

SPEAKER 2

That makes a lot of sense. And did it work?

SPEAKER 3

Yes, Kate. We created the first natural formula that attacks the root cause of type 2 diabetes and regenerates the body. According to our laboratory tests, our formula works in just a few minutes and starts to hunt down and attack the diabetic bacteria that are spread throughout the body. And that's not all. The most impressive thing is that according to our analyses, using advanced microscopes, we discovered that after six months, the body is able to absorb the nutrients in the formula and ends up creating a kind of protective layer against the diabetic bacteria. In other words, we noticed that everyone who used it for six months did not have any problems with the diabetic bacteria in their body bodies.

SPEAKER 2

Again, it's amazing. I'm so impressed that after only six months of using the formula, the body is completely protected and doesn't have problems with diabetes anymore.

SPEAKER 3

Yes, exactly why I decided right after that to have my father follow the full 6 month treatment. I arrived at his house with 6 bottles and told him to take them every night before bed without fail. Unfortunately, he had already lost hope and didn't want to follow through. But I told him that it was a gift from God for us. It was our only and last chance. So he agreed.

SPEAKER 2

And what was the result?

SPEAKER 3

Well, I think it's better if he answers himself. Dad, could you share your experience?

SPEAKER 4

I was hoping, Richard, that I had a bigger part. Anyone fighting this disease needs to hear this. When Richard brought the formula, I confess, I doubted it. Even so, I followed the instructions and it took 20 drops every night. What happened next still moves me. In the first few days, my glucose remained High, but I had much more energy. By the third week, I saw my glucose drop from 355 to 229. Now, the best part came after the first month, when the dark spots started to disappear. That

motivated me even more and I kept going without missing a day. After eight weeks, I could already see things more clearly. You have no idea what it's like to be able to see again after months, thinking I'd never see my grandson's face again. That, for me, is priceless. However, the most incredible thing happened when I completed six months of treatment on Sunday, Tommy came to visit me as he always did. But this time, instead of seeing me stumbling around the house, he found me preparing the hunting gear. Grandpa, what are you doing? We're going hunting today, Tommy. We go back to the cabin and do you know what happened? I shot a deer from 200 meters away without a sight. Tommy looked at me as if I were a superhero. In that moment, I was no longer the sick grandpa. I was the strong grandpa, the war veteran, the legendary sharpshooter that he only knew from stories. And all of this thanks to God and to my son Richard, who spared no effort in studying and helping me. To this day, I feel if Jesus himself had touched my eyes and given me back not just my vision, but my whole life. The first thing I did, I threw away my medications. That constant fear, the uncertainty, the weight on my shoulders, it's all gone. Now I know I'm going to live, at least in those days. Thirty years by the side of those I love. And the best part, after completing a six month treatment, my glucose is completely under control, my tests are still perfect, and my vision is completely restored.

SPEAKER 2

What an incredible story, Doc. You must be so proud.

SPEAKER 3

Absolutely, Kate, absolutely. And look, after saving my father, I thought my mission on earth had been completed, you know.

But I wasn't prepared for what happened next. An old friend of my father also healed. We have a video of her, if the producers could put it on the screen.

SPEAKER 5

I'm Nancy Wilson, 64 years old. I was diagnosed with type 2 diabetes eight years ago and followed everything the doctors told me. I took medications, followed diets, lost weight, gained weight, and my diabetes only got worse. My glucose hit 340. I developed a horrible ulcer on my right foot that hadn't healed for over a year. The doctors had already scheduled the date to amputate my foot. Only imagining the amputation made me want to die. I didn't want to be a burden to my family, but James insisted. I tried the formula his son developed. I took one last chance. Every morning, I would drop 20 drops in cold water and drink it. What happened next? A true miracle. In four days, the pain in my foot nearly disappeared. In the first week, my glucose dropped from 416 to 188. And for the first time in months, I was able to sleep through the night. In the first month, my black and horrible ulcer began to improve. It was still open, but much better. In the third month, my children couldn't believe what they were seeing. That ulcer was finally closing. In the sixth month, my ulcer disappeared. My legs stopped swelling, and like a miracle, I was able to walk on my own again. My doctor took pictures for medical conferences. In 30 years of practice, I've never seen a diabetic ulcer of this degree regenerate. He said. Since then, my blood sugar has remained below 95. My skin is healthy. 10 months without medication or blood sugar spikes. I thank God, James, and Dr. Sullivan for giving me my life back.

SPEAKER 2

Wow, that is so moving. I mean, this isn't just a treatment. You're giving dignity back to these people. Doctor, I believe that seeing these results, your next step would be to make it available to more people. Am I right?

SPEAKER 3

Yes, Kate, exactly that. Now, seeing these incredible results, I had two certainties. First, anyone could reverse type 2 diabetes regardless of its severity. And second, more people have the right to have access to this. I made a promise. If it's up to me, no family will see their loved ones suffer like this. It wouldn't be fair to keep this just to myself. So I partnered with some of the biggest research centers in the United States. We conducted rigorous tests and met all the legal requirements to bring this discovery to America. And that's when I decided to create the most concentrated formula possible to attack the root cause of type 2 diabetes. Instead of capsules, we developed an ultra concentrated liquid in the form of drops for the patient to add to cold water, creating their own biblical drink at home. Additionally, the liquid form goes directly into the bloodstream, eliminating the diabetic bacteria and restoring the body from the inside out. Oh, and with the dropper, it allows for a precise and adjustable dosage. Also, the formula has a sweet taste with stevia, making the treatment a pleasant experience.

SPEAKER 2

Fascinating. And how did you decide to name this revolution formula?

SPEAKER 3

We named it Glyco Clean. Glycocline is the only 100% natural drop solution that contains active ingredients capable of attacking the root cause of type 2 diabetes. The true power of glycocline lies in how these four sacred ingredients work together in perfect harmony. First, the sacred cinnamon, which works by eliminating the diabetic bacteria from the body, cleansing your system from this silent plague and strengthening the good bacteria. Then the hyssop comes into play, regulating glucose levels and restoring insulin sensitivity so your body can start controlling sugar naturally again. Next, the Rose of Jericho accelerates cell regeneration, restoring the damaged intestines, strengthening the nerves and speeding up the healing of all internal and external wounds. And finally, the wild ginger reduces inflammation, protects the nervous system and awakens your metabolism to burn fat and stabilize your glucose levels. In the long term, it's no surprise that patients using glycocline not only improve their blood sugar levels and restore the damage caused by the disease, but also managed to lose an impressive 15.4 to 22 pounds in just a few weeks.

SPEAKER 2

Wow, Doctor, that's impressive indeed, Kate.

SPEAKER 3

Even before making it available to the public, we decided to closely monitor the first 3,000 people who chose to use glycoclean. Our goal was to publish all the scientific data in the leading medical forums and important America. And we managed to prove that everyone who used glycocline for six months was able to control their blood sugar, regardless of age, genetics, or how long they had been diagnosed.

SPEAKER 2

And did you make it?

SPEAKER 3

Yes. So much so that the FDA is considering glycocline the greatest finding against high blood sugar of the last 80 years. That's why I can confidently say anyone can eliminate type 2 diabetes using glycocholine. And it's more than that. It's guaranteed that you will lose weight, gain more energy, reduce hunger, have younger skin, stronger muscles, and many other health benefits for your daily life.

SPEAKER 2

Honestly, I'm amazed. I've never seen anything like this before. So glycocline is already approved by the FDA?

SPEAKER 3

Yes, Each bottle is manufactured in the USA in FDA and GMP certified facilities under the strictest standards. The bottles are vegan, non GMO and safe. They contain no harmful stimulants, toxins, or risks of addiction or tolerance.

SPEAKER 2

Incredible. But I still have a question. Can it interfere with medications? I mean, how does that work?

SPEAKER 3

So that's a great question. It doesn't interfere with medications. And in fact, glycoclean is already recommended by over 13,000 doctors. We receive several videos daily and I even brought one.

SPEAKER 6

Hello, I'm Dr. Jonathan Harper, an endocrinologist trained at Stanford. In my 11 years treating diabetes, I've seen patients who tried everything. Insulin injections, diets, exercise, metformin and in the end, with no lasting results. Moreover, many suffered from side effects and continued to struggle. Moss. But everything changed when I saw Dr. Sullivan's accreditation from Stanford University and got to know his work as a doctor. I didn't believe that type 2 diabetes could be reversed until I saw all the proof. Proof of how Glyco Clean eliminates the diabetic bacteria and restores the body from the inside. After that, I started recommending it to my patients. Honestly, I've never seen anything as powerful in controlling glucose and reversing type 2 diabetes. Glyco clean is the most advanced and effective formula ever created against this disease. I use it with all my patients because it doesn't interfere with medications, it's non addictive, and it attacks the true root of the problem. What Dr. Sullivan created is not just a treatment, it's a revolution.

SPEAKER 2

Wow. Amazing. Now the question on everyone's mind. How can our viewers get access to Glycoclean?

SPEAKER 3

Great question. Glycoclean can only be found on our official website where we guarantee its authenticity and a fair price without the interference of big pharmaceutical companies. But I've already asked my team to see if it's possible to make it available here for your audience as well. It's not sold in pharmacies because they tried to interfere with our formula, which we of course, did not accept. Additionally, it is also not available on ebay or Amazon due to the high number of counterfeit products that harm the patient.

SPEAKER 2

Now that I can totally understand. But do we have any exclusive discount for the viewers who are watching right now? Because my team is already receiving hundreds of messages from people wanting to purchase Glycoclean.

SPEAKER 3

So. So, Kate, this commercial part isn't really my thing, but I just received fantastic news. We got approval to launch here and now a special campaign called Goodbye Diabetes. A unique opportunity.

SPEAKER 2

Really? That's great. And tell us more about the campaign.

SPEAKER 3

See, Kate. During the Goodbye Diabetes campaign, we are offering a special deal. First, everyone who makes a purchase will receive an unconditional 60 day guarantee. In other words, it's 100% risk free. Either you reverse your diabetes and

transform your life, or we refund all your money. Second, we will give free bottles to those who secure their order today.

SPEAKER 2

Free? Did I hear that right? Free bottles and a 60 day guarantee. You guys are crazy.

SPEAKER 3

That's our commitment. Kate. Glyco Clean was not created to make a profit. My clinic in Santa Barbara already serves that purpose. Our mission is to free as many people as possible from type 2 diabetes. That's why we're offering these bottles today. And about the guarantee, well, you've seen the results with your own eyes. Our formula is 100% fail proof. No one has ever had a negative experience, which is why we trust it so much.

SPEAKER 2

Sensational. Doctor, I'm impressed. But my team just informed me that we have 10,300 and some odd people watching live. Do you have enough bottles for everyone?

SPEAKER 3

Wow, that many? Unfortunately, we don't have enough bottles for everyone. Our current batch is running out and the next one might take six months to a year to arrive. Because the sacred ingredients in Glyco Clean are extremely rare, all imported from remote regions of Israel. And due to the ongoing war there, our suppliers are facing difficulties importing the raw materials for

the ingredients. They might even triple the price. That's why we will only be able to release a few bottles for those watching us.

SPEAKER 2

Now, that's completely understandable, doctors. So those who act first secure the treatment. But one question. How many bottles of glycocline are needed to truly eliminate type 2 diabetes?

SPEAKER 3

Great question. With one bottle, you'll already see your glucose stabilizing. But as I showed, to completely eliminate the diabetic bacteria and restore your body, the ideal is six months of treatment. I mean, think about it. You didn't develop diabetes overnight. It took years for this to happen. So it can't be reversed overnight. That's why those who follow the full treatment have permanent results and never worry about diabetes again.

SPEAKER 2

Makes sense. The body needs time to absorb the nutrients and restore balance. Now. Doctor, could you explain more about the Goodbye Diabetes campaign and how those watching can secure the free bottles?

SPEAKER 3

Of course. The Goodbye Diabetes campaign was created as a way to make glycoclean more accessible. After all, have you ever wondered how much your health is worth? How much is it worth to free yourself from the burden of diabetes? How much

is it worth to live happily and healthily for many years alongside the people you love most? The truth is that no matter who you are, you, your health will always be worth more than anything else. I remember the desperation when my father was losing his sight. I risked everything I had to create this formula, not even knowing if it would work. And I'm sure if I went to an emergency room where a diabetic is about to undergo an amputation and said to them, we don't need to amputate anymore. I have a treatment that will cure you. And in a few months, your foot will be good as new and you'll be able to play soccer with Your grandson again. But this treatment costs \$50,000. You know what they would do, Kate? They'd sell their house, their car, or take out a loan from the bank. Bank. But they'd find a way. But hold on, you at home won't need to do any of that. I never wanted money to be an obstacle for anyone who wants to get glycoclean. I'm a doctor and my greatest fulfillment is seeing people healthy. That's why today, during our Goodbye Diabetes campaign, you at home will be able to get glycoclean at a highly accessible promotional price. It won't cost you \$50,000. It won't even cost you the original amount of \$400 per bottle, which is the official price on our website. No, not even half of that. In fact, it won't even cost \$150. During our goodbye Diabetes campaign, glycocline is available at an exclusive discount with a price lower than wholesale. And today you can get one bottle for just \$69. But there's more.

SPEAKER 2

What do you mean there's more? That's amazing.

SPEAKER 3

Well, I said I would give some free bottles. Here it is. Since the best results come with prolonged use of glycoclean, we're

offering two exclusive packages with three and six bottles of glycoclean. In the three bottle package, you pay for two and get one completely free. In a six bottle package, you. You pay only for three and get three more completely free. So in this special promotion, the six bottle package of glycoclean is just \$49 per bottle. That's less than \$1.50 a day. It's the prices of a cup of coffee to eliminate the diabetic bacteria, control your blood sugar, and see your body heal from the inside out. But remember, this special discounted package will only be available today while we're live. And as long as supplies last. And, well, with the number of people watching live, I believe it'll be sold out in the next few minutes. And since we're going through a tough time due to the wars in Israel, the price of glycoclean will probably double starting with the next stock. So, Kate, if you like, you can leave a button below the interview. That way everyone watching can click below and secure their bottles of glycoclean.

SPEAKER 2

Perfect. Let's do that then. So if you're watching this program right now and want to start reversing type 2 diabetes this week, just click on the 6th bottle kit below this video or on the kit that best suits the your needs Now Doctor, let me ask you a question. What about shipping? How much is that?

SPEAKER 3

Well, the shipping for the three bottle and six bottle kits is completely on us, 100% free for all of the us. But keep in mind the free shipping is included in this special and exclusive promotion and it will only last while we still have stock available. This means that when this interview ends, you will only be able to purchase your Glyco Clean bottles at the normal price with

no discount and with shipping costs. Not to mention that when our stock runs out, we don't know when we'll have new stock available. And with the raw material shortage, we may have to triple the price of glycoclean. So dear viewers, with Kate and the production team's permission, we'll leave the purchase button below this video. So if you want to secure the best and most affordable treatment for type 2 diabetes and pre diabetes in the US, click on the six bottle package or any other option you prefer and place your order in now. Also, I have a few little gifts for those who purchase today.

SPEAKER 2

Gifts? I didn't know about those. What are those gifts doctor?

SPEAKER 3

For the first 10 people who choose the complete six bottle kit today. First, these 10 people will have a private consultation with me via Zoom where I will personally track your progress in the fight against the diabetic bacteria. Additionally, they will receive a signed copy of my book Sugar Balance Blueprint along with their Glyco Clean bottles. And there's more. I will include a \$500 gift card to Kohl's. Do you know why? Because when you finally reverse your type 2 diabetes, you'll need new clothes for your healthier renewed body. Many of our patients lose between 15 and 22 pounds in the first few weeks using Glyco Clean. Besides, everyone who secures the complete six month or three month kit today will enter a giveaway for something incredible.

SPEAKER 2

Don't keep us in suspense. What exactly is it Doctor?

SPEAKER 3

Five lucky people along with up to three companions each will win a luxurious nine night Mediterranean cruise on the Viking Star. Imagine celebrating your new life free from diabetes while visiting amazing places like Santorini, Dubrovnik and Venice. And do you know why I specifically chose the Viking Star? Because they have the best restaurants in the world on their cruises. There's no better way to celebrate a life free from type 2 diabetes than by enjoying great food with no restrictions while creating unforgettable memories with your family.

SPEAKER 2

This is an amazing offer. Honestly, I even want to buy it too. And I don't even have diabetes Doctor, can I go ahead and release the treatment for our viewers so they can secure their Glyco clean and enter for the chance to win that dream trip?

SPEAKER 3

Of course, go ahead.

SPEAKER 2

Producers, please set up the purchase button for our viewers. All good. You at home, Just scroll down the page to see the available kits. You can choose the full six bottle treatment where you pay for just three bottles and get three free, or the three bottle kit where you pay for two bottles and get one free. Only the first 10 people receive all those special bonuses, including the private consultation. And everyone who places an order

today will be entered for the luxury Mediterranean cruise. Is that right?

SPEAKER 3

That's right, Kate. But this offer is only available now while we're live. Think of it as the smallest but most powerful investment you can make in your health and quality of life. Just one bottle of glycoclean starts eliminating the diabetic bacteria and stabilizing your blood sugar levels within weeks ending problems like excessive thirst, chronic fatigue and uncontrollable sugar cravings. Three bottles can be enough for a significant transformation of your body with more energy, less pain, and fewer pounds on the scale. But six bottles. Six bottles of glycocline can protect your body not just against type 2 diabetes, but also against all the devastating complications caused by the diabetic bacteria as it spreads throughout your body. I'm talking about heart problems, kidney issues, vision problems and even neurodegenerative diseases like Alzheimer's, what scientists now call type 3 diabetes. With six bottles, you're giving your body a chance for complete regeneration, eliminating years of accumulated damage from the diabetic bacteria. It's like going back in time and reclaiming the health you had 20 or 30 years ago.

SPEAKER 2

Wow, Doc, this is really impressive. And what about the safety of the order, Doctor, can the viewers feel reassured?

SPEAKER 3

Absolutely, Kate. Every Glyco Clean order is processed through Cartpanda, one of the largest online payment processors in the

the world. Cartpanda uses the same security system as banks like bank of America and JP Morgan. This means your transaction will be protected by the same security technology that safeguards the fortunes of the wealthiest billionaires in America. And to make this decision even easier, every Glyco Clean order comes with our unconditional 60 day guarantee. That's right, Kait. We're offering a full two months to try Glyco Clean with no risk. If for any reason the customer is not 100% satisfied with the results, simply contact our team and we'll refund every every penny invested. No questions, no bureaucracy.

SPEAKER 2

Wait, so let me get this straight, doctor. Are you saying that the customer can use two full bottles of Glycoclean and still request a refund if they're not completely satisfied?

SPEAKER 3

Exactly, Kate. It's like going to your favorite restaurant, enjoying a full meal and still getting a full refund if the food doesn't meet your expectations. I know no restaurant would do that, but I believe so much in the power of Glycoclean that I make it a point to offer this absolute guarantee so everyone can try it without fear. And if you're still unsure, I want to share a very special story that I recently received. Maria emailed me telling me that when she saw Glycoclean on TikTok, she was so excited that she bought the six bottle kit of Glycoclean right away. But when she told her husband, he was very skeptical and said it was probably just another one of those products that don't work. So Maria decided to request a refund. And guess what? Within minutes, she'd received all her money back and even a message saying, keep the product and keep trying. That

gave her the confidence to really give glycocline a chance. Now, three weeks later, Maria told me her blood sugar levels are returning to normal, she feels full of energy, and she's already lost 5 kilos without even trying. In her message, Maria thanks us for having that refund policy because it allowed her to try it risk free and experience a real life change. But the truth is, some people just aren't ready to face the diabetic bacteria and reclaim their health. And that's okay. If that's the case for you. I wish you luck because honestly, I know it's not easy. My father has been in your shoes, so I know what you're going through. The constant fear of laying your head on the pillow and having sugar spikes or potentially leading to a diabetic coma and waking up on a hospital stretcher about to go blind or have a limb amputated. But unfortunately, if you don't do something different right now, there's nothing that can improve your condition. Type 2 diabetes will only continue, continue to progress. And you know that. That's why I ask that you give us a vote of confidence. We have this unconditional guarantee for a reason to free you from the risks. We just want to see you healthy again. If that doesn't happen, we'll return your money. You literally have 60 days to test it risk free. So if you're ready for a complete transformation, all you need to do is select your preferred kit below, take advantage of this special discount and start your journey today. There are no hidden fees, no confusing subscriptions, no just a one time investment in your health and quality of life. Remember, Glyco Clean is only available here on this page and every purchase is protected by my 60 day satisfaction guarantee. You literally have nothing to lose and a lifetime of freedom and vitality to gain.

SPEAKER 2

Once again, Doctor, thank you so much for this. This is truly an incredible opportunity and with such a solid guarantee, there's

no reason to hesitate. If you're ready to leave type 2 diabetes in the past and embrace horizontal future full of energy and health, choose your Glyco Clean kit right now. Just click the button below and take the first step toward the life that you deserve.

SPEAKER 3

That's right, Kate. This could be the most important decision the viewers make this year. And I can't wait to start hearing more transformation stories now. It's time to act. You may not realize it, but you're at a crucial crossroads in your life. And at this moment, you really only have two options which lead to very different futures. So please listen closely as I explain what these two choices are so you can make the best decision for yourself and your loved ones. Option one is to continue as you are, following exactly what the conventional healthcare system wants you to do, spending the rest of your life on medications that only try to control the symptoms, but never address the true cause, the diabetic bacteria that's eating away at your body from the inside. Choosing not to act now means accepting a life that becomes increasingly limited, watching your energy, vitality and independence decrease every day. It means living constantly with the fear of terrible complications like amputations, blindness, heart attacks, strokes, losing years or even decades of your life. And worse, it means risking becoming a burden to your family and friends, needing constant care until the end of your days. I know this is not what you want, and I highly doubt you would have stayed with me this long if you were willing to settle for this dark future.

SPEAKER 2

Doctor, I understand that you're being so direct because you truly, truly care about the health and well being of our viewers. Isn't that right?

SPEAKER 3

Exactly, Kate. If I'm being so straightforward, it's because I don't want to see anyone suffering unnecessarily from a condition that can be naturally and permanently reversed. The truth is, the door to a life free from Worrying about type 2 diabetes is right in front of you. I've opened it for you. All you need to do is take a step forward and Walk through it. And that's why I ask you to seriously consider option two, A choice that allows you to say goodbye to diabetic bacteria and type 2 diabetes for good. Imagine waking up every morning feeling full of energy and vitality, as if you were 20 again. Imagine being able to enjoy your favorite foods without fear, Travel, dance, play with your grandchildren. Think of all the money you'll save when you no longer need to spend on medications, test strips, doctor visits, money you can invest in your dreams, your children's education, that trip you've always wanted to take.

SPEAKER 2

It sounds too good to be true, doctor. But can Glyco Clean really deliver on all of these promises?

SPEAKER 3

I have no doubt, Kate, because unlike anything else you may have tried so far, Glycoclean targets the true root cause of type 2 diabetes, the diabetic bacteria. It's the only clinically proven solution to eliminate this bacteria and allow your body to replace return to its natural state of balance without surgery,

without conventional medications, without side effects. And the best part, all that's required from you is to decide that you deserve this second chance. That you love yourself enough to say yes to a bright future full of possibilities, starting right now.

SPEAKER 2

And to do that, all you have to do is choose your preferred Glyco Clean kit right below. Right now, right doctor?

SPEAKER 3

That's right, Kate. I highly recommend the six bottle kit for faster and longer lasting results. And remember, this is a limited time offer with a special discount that probably won't ever repeat. There's no subscription, no hidden charges. It's a one time investment in your health and quality of life. So please don't let this opportunity slip away. Fill out your information in our 100% secure form now before life happens and these kits sell out. Secure your access to these exclusive Glyco Clean family and start your journey today towards a completely renewed life free of worries and full of joy.

SPEAKER 2

You heard the doctor. This is your chance to make the right choice for your health and your future. Click the button below, choose the perfect kit for you and take the first step toward a transformation you never thought was possible. The life of your dreams is waiting for you on the other side.

SPEAKER 3

I couldn't agree more, Kate. Remember, no one can make this decision for you. But I sincerely hope you choose to believe in yourself and in the power of Glycoclean to eliminate the diabetic bacteria that is causing your type 2 diabetes. I'm rooting for you. More than 13,000 former diabetics have already used Glycoclean to eliminate the diabetic bacteria, stabilize their blood sugar levels and regain their health and vitality. This is your chance to join them and start an extraordinary new chapter in your life. But remember, time is running out. This special discount and exclusive bonuses for the first 10 people may expire at any moment as soon as our limited stock runs out.

SPEAKER 2

So don't waste another second. Act now and make the one choice you can make for yourself, your health and your family.

SPEAKER 3

Choose your preferred Glyco Clean kit below and experience its transformative benefits completely risk free for 60 days. If for any reason you're not 100% satisfied, just let us know and we'll refund every penny you invested, no questions asked.

SPEAKER 2

Oh, and don't forget, the only place where you can get glycoclean is here on this page. Don't miss this golden opportunity to reverse your type 2 diabetes and regain the full active life you deserve.

SPEAKER 3

Thank you for staying with us until now. I know this decision is in your hands, but I sincerely hope you say yes to this opportunity to start fresh with health, energy and joy.

SPEAKER 2

Do what over 13,000 people have already done. Click the button below, choose the perfect gift for you and start your transformation journey. Today. A bright future free from diabetes awaits you.

SPEAKER 3

I'm rooting for you and I can't wait to hear your success story. See you soon and good luck. Even after everything we've shared today, it's natural that you still have some questions about glycoclean. So let me quickly address some of the most common questions I receive every day from people like you. John From Florida asked Dr. My blood sugar dropped very quickly after I started using glycoclean. Why did it happen so fast? Is this normal? Great question, John. And don't worry, this rapid drop is completely normal and safe. Do you know why? Because glycoclean directly targets the true root cause of your type 2 diabetes, the diabetic bacteria that's attacking your pancreas and preventing normal insulin production. By eliminating these invading bacteria, glycocline allows your body to respond normal normally to the insulin you produce. That's why you experience such a fast and lasting stabilization of your glucose levels.

SPEAKER 2

It's amazing how quickly the results can actually show up. And what else can people expect in the first few weeks of using glycoclean?

SPEAKER 3

Dr. Great question, Kate. In the first two weeks, in addition to the progressive drop in blood sugar, our customers report a number of significant health improvements. The chronic fatigue they've been dealing with for years begins to fade, making way for a new surge of energy and vitality. Typical diabetes symptoms like excessive thirst, blurry vision, dizziness and tingling in the feet start to decrease. And the most incredible part, by the end of the six month treatment, many are thrilled to hear from their doctor that there are no longer any clinical signs of type 2 diabetes. It's like receiving an official certificate of freedom to fully enjoy life without the fear of complications.

SPEAKER 2

What wonderful news for John and everyone starting this journey. Doctor, we have another question here from Dorothy in California. She says, I admit that I was skeptical about glycocline because I've tried many other supplements without success. But after completing the six month treatment, I have no doubts. My blood sugar has stabilized at 94, even when I allow myself the occasional dessert. Why is glycocline so different from everything I've tried before?

SPEAKER 3

Dorothy, I'm glad you gave glycocline a chance and experienced such transformative results. And you raise a crucial point about what makes our formula truly unique.

Glycocoline is the first and only supplement specifically designed to eliminate the diabetic bacteria and reverse insulin resistance, thanks to its precise combination of four sacred, sacred cinnamon hyssop, rose of Jericho and wild ginger from the Jordan Valley. While these ingredients are mentioned in the Bible and have been used for centuries in traditional medicine, our team pioneered an extraction process that preserves and enhances the bioactive compounds of these rare ingredients. This means that unlike common shelf supplements, glycoclean delivers a much higher concentration of these compounds in their purest and most bioavailable form. Additionally, our formula is designed for easy absorption and maximum convenience. You can add the drops to cold water or your favorite drink in the morning, creating your own biblical drop drink at home. And the best part, Glycoclean is non habit forming, has no known side effects and can be safely used alongside other medications always under the supervision of your doctor.

SPEAKER 2

It really is an innovative approach and the results are long lasting even after finishing the treatment, right?

SPEAKER 3

Yes, Kate, that's the real game changer. After completing the six month treatment, our clients experience a complete elimination of the diabetic bacteria. Gut health is rebalanced, crack chronic inflammation disappears and insulin response is permanently restored, meaning stable blood sugar levels in the long term, just like a healthy person's even years after finishing the protocol. That's why I confidently say that glycocoline is the only solution that can naturally and sustainably reverse type 2

diabetes, freeing you from complications, restrictions and worries once and for all. Richard from Ohio shared An incredible story, he said. I finished the six month glycoclean treatment and my doctor was amazed by the results. He had never seen a patient reverse type 2 diabetes so completely and durably. Now he's considering recommending the treatment to other patients. What do you think, doctor? Well, Richard, I am extremely happy and honored to hear that your doctor recognized the transformative power of glycoclean. Unfortunately, many people still doubt that it's possible to reverse type 2 diabetes because they've been conditioned to believe it's a progressive and irreversible condition. Additionally, the proliferation of ineffective supplements on the market has led to understandable skepticism. But what truly makes glycoclean unique is the innovative science behind our formula. Unlike other products, we target the root cause of the problem, the diabetic bacteria that attacks your pancreas and blocks proper insulin production. Our precise combination of sacred ingredients was specifically designed to eliminate this bacteria and restore insulin sensitivity in a second, safe and lasting way. That's why even endocrinologists and diabetes specialists with decades of experience are impressed when they see the transformation in patients who complete the six month treatment. The results are simply unparalleled. So yes, Richard, tell your doctor that he can confidently recommend glycoclean. Our team of experts is always available to answer any questions and provide all the support needed.

SPEAKER 2

It's truly inspiring to see the medical community embracing this inequality. Innovative solution Dr. The next question comes from Barbara from Texas. She wrote, I ordered three bottles of glycoplene and they arrived the next day super fast. I'm loving

the treatment and my blood sugar has already dropped from 280 to an average of 140. My doctor said I'm close to reversing my diabetes now. I'm regretting not buying the full six month treatment right away. Is it still possible to place another order?

SPEAKER 3

So, Barbara, I'm glad to hear you're already experiencing such promising results with glycoclean. I completely understand your desire to secure the full treatment for even deeper and more lasting reversal. The challenge is that after my discovery went viral on social media, we received an unprecedented flood of orders. The last time I checked with my team, there were only a few bottles of glycocline left in stock. As I mentioned earlier, each batch of our supplement takes three to six months to produce. This is because we insist on using only the purest and rarest ingredients, which are imported directly from Israel. Additionally, with the current war situation in Israel, it's becoming increasingly difficult to obtain these sacred ingredients in the quality and quantity we need. The extraction process we've developed to enhance the bioactive compounds is extremely complex and time consuming, taking several weeks to complete. But it's precisely this care and precision that ensure the unmatched effectiveness of Glyco Clean. So Barbara, if you want to take advantage of this chance to complete your treatment, my recommendation is to place your order as soon as possible while we still have a few bottles available. Because once this batch runs out, it could take up to six months to produce a new one. And to ensure everyone has a fair chance, we'll create a waiting list and fulfill orders strictly in the order they received. So don't waste any time. Secure the remaining bottles for your permanent freedom from type 2 diabetes.

SPEAKER 2

Now, without a doubt, valuable advice for Barbara and any everyone considering starting or completing the treatment to wrap up Dr. We have Frank from Illinois. He says, how can I be sure that glycoclean will work for me? I've been dealing with diabetes for over 20 years and have lost hope. I also have other health conditions like high blood pressure and joint pain.

SPEAKER 3

Frank, I deeply understand your hesitation after so many years fighting diabetes. But I want you to know that there is hope no matter how long you've been dealing with this condition or how severe it may seem. Glycocoline has been extensively tested on hundreds of volunteers with a 100% success rate. It has proven effective for both men and women ranging from 20 to 80 years old, whether they were newly diagnosed or have had diabetes for decades. We achieved the same impressive results across all types of cases, from mild to severe. Even patients with very serious conditions such as non healing ulcers, advanced diabetic neuropathy, and vision problems experienced complete reversal with glycoline. So think with me. If our revolutionary formula has worked in even the most extreme and complex cases, why wouldn't it work for you too? And here's some great not only is glycocoline perfectly safe for people with other health conditions like high blood pressure and joint pain, but it may even help improve these conditions. That's because by eliminating the diabetic bacteria and the chronic inflammation it causes, Glyco Clean promotes a complete rebalance of your body. With your metabolism functioning at full capacity, your entire immune system is strengthened. So, Frank, rest assured, Glyco Clean is proven to be safe and effective for everyone, regardless of medical or health history. I have absolute confidence that it will work for you, just as it has for over 13,000

people of all ages, backgrounds and lifestyles. William from North Carolina shared an incredible experience, he said. I loved the cruise. I won it. It was my first time traveling first class and it was simply extraordinary. My wife and I especially loved the seafood dinner on the second night. I admit I was a bit skeptical that it was real, but in the end, everything worked out. Why did you decide to do this five star cruise giveaway? Doctor? Well, William, I am so happy to hear that you and your wife had such a special and memorable experience. We decided to create this cruise giveaway as a way to give back and sincerely thank people like you. You who trusted Glycoclean and gave us the opportunity to be a part of your transformational journey. You know, from the very beginning, our goal with this treatment was never about profit. Our mission is to help as many people as possible break free from the shackles of type 2 diabetes and regain their health, vitality and quality of life. Of course, we use part of the revenue to keep our website running, produce new batches with the same premium quality, and adequately compensate our dedicated team. But a percentage of the profits, we make sure to reinvest in these dream trips for our most loyal customers. It's our way of saying thank you so much for believing in us. Now we want to offer you and your family a unique and unforgettable experience that you can treasure forever in your hearts. And let's be honest, there's nothing better than celebrating a renewed life free from type 2 diabetes with a 5 star luxury cruise through the Mediterranean, right?

SPEAKER 2

Absolutely. And a really amazing initiative. Doctor. I'm sure William isn't the only one who walked away with a smile on his face and a heart full of gratitude. Our next question comes from Carlos in California. He wants to know, is my order really safe? I'm worried about being scammed. I brought other products

before and wasn't satisfied. How does your guarantee work exactly?

SPEAKER 3

Carlos, I completely understand your concern. Unfortunately, with so many questionable offers out there, it's natural to feel apprehensive before making an online purchase. But? But I want you to know that with Glycoclean, your purchase and personal information are 100% protected from START to finish. We work with Cartpanda, one of the largest and most reliable payment processors in the world. They use the same advanced encryption and top tier security systems that major banks like bank of America use to protect their clients information and transactions. This means that when you place your order, you are receiving the same level of protection used to send safeguard the wealth and assets of the country's wealthiest and most influential individuals. Rest assured your data will never be shared, violated or used for any other purpose. Your privacy is our top priority. And there's more. As soon as you click on one of the kits at the bottom of this page and secure your Glycoclean supply, you will automatically be covered by our unconditional 60 day satisfaction guarantee. What does that mean? It means that if for any reason, at any time within these six months you're not 100% satisfied with Glycoclean or change your mind about the treatment, simply contact us via phone, email or through our app. We will refund every penny you spent, no questions asked and with no bureaucracy. You can count on it. You will be treated with the utmost respect and care by someone who genuinely cares about your satisfaction and will do everything possible to ensure your experience with Glycoclean is flawless from start to finish. With our Fail safe guarantee, you, you truly have nothing to lose and a lifetime of health and freedom to gain.

SPEAKER 2

It's hard to resist with a guarantee like that, isn't it? Any more questions before placing the order, doctor?

SPEAKER 3

Ah, sure. Ruth from Indiana asked. Okay, you convinced me. I'm ready to order Glycoclean right now. What exactly do I need to do? Well, I'm glad to hear that, Ruth. I assure you, you won't regret it. To access the complete treatment that will change your life, just follow a few super simple steps. First, click on the button for the kit that best fits your health goals. I strongly recommend the six Bottle Premium Kit for faster, deeper and more permanent results. Remember, six bottles won't just reverse your type 2 diabetes, but it will also shield you from all the dreaded long term complications of the disease. Additionally, by eliminating the diabetic bacteria and the chronic inflammation it causes, you'll be strengthening every cell in your body and drastically reducing the risk of developing other serious conditions in the future, like heart disease, kidney issues and even Alzheimer's. It's an investment not just in your present, but in your future. Next, simply fill in your contact and delivery details on the secure form on the next page. Confirm your payment method with the Cart Panda guarantee and finalize your order. It's that simple. Once your order is processed, our team will work tirelessly to ship your glycoclean bottles as quickly as possible so you can start your transformation journey without delay. When you receive your kit at home, remember to take Glycoclean daily, preferably in the morning. Just add the drops to a glass of cold water or your favorite drink. The effectiveness is the same in no time, you'll start being amazed by the results. Your glucose will stabilize, your energy will increase. Those pains and tingling sensations

will lessen. Every day you'll be closer to saying Goodbye to type 2 diabetes for good. So don't waste any more time. Don't delay this new beginning. Click now on the kit you've chosen and take the first step to transform your health, regain your freedom and recover the quality of life you deserve. Glyco Clean has already changed the lives of over 13,000 people. I have no doubt that it will change yours too. Trust in the healing power of your own body. Place your order today and begin writing a new chapter full of energy, vitality and joy. Remember, you are protected by our unconditional 60 day guarantee. You have nothing to lose. Shall we embark on this journey together?

SPEAKER 2

So, which kit will you choose? Six bottles for a complete and lasting transformation or three bottles for a fresh start? No matter the option, your new life starts now. Just click the button below and place your order.

SPEAKER 3

We'll be here, ready to process your order with the utmost speed and care. I can't wait to hear your success story in the coming months. Remember, with Glycoclean, reversing your type 2 diabetes isn't a possibility, it's a certainty. And I believe in you, Sam.
