

Senior Project Manager – NG911 (Promethean One)

Location

Remote (U.S.-based) with periodic travel to Sacramento, CA

Job Type

Contract

About the Role

Promethean One is seeking a Senior Project Manager to lead complex, mission-critical Next Generation 9-1-1 (NG911) initiatives supporting statewide public safety communications. This role requires deep experience managing large-scale IT and telecommunications programs, including vendor coordination, migration planning, and stakeholder alignment across public sector organizations.

Key Responsibilities

- Lead end-to-end project management of NG911 pre-migration and migration plans.
- Develop, maintain, and execute integrated project schedules aligned with statewide deployment goals.
- Coordinate activities across vendors, PSAPs, stakeholders, and government agencies.
- Monitor project progress, identify risks, and implement mitigation strategies.
- Provide executive-level reporting, dashboards, and briefings.
- Ensure quality assurance processes and project governance standards are maintained.
- Facilitate stakeholder communication and alignment across technical and non-technical teams.
- Drive issue resolution, gap analysis, and continuous improvement initiatives.
- Support policy development and strategic recommendations for NG911 deployment.
- Act as a trusted advisor to leadership on program execution and risk management.

Qualifications (Required)

- Minimum 7+ years of project management experience, including leadership of large IT programs.
- At least 4 years in a senior project management role on complex technology initiatives.
- Experience with Next Generation 9-1-1 (NG911) or similar public safety systems.
- Bachelor's degree or equivalent experience.

- Project Management Professional (PMP) certification (required).
- Strong experience with project planning, scheduling, and stakeholder management.
- Excellent communication, leadership, and problem-solving skills.

Preferred Qualifications

- Experience with complex IP-based networks supporting voice/data communications.
- Background in public safety, emergency communications, or government programs.
- Experience working with multi-vendor environments and large-scale system integrations.
- Familiarity with Agile, hybrid, or traditional PM methodologies.

Work Environment & Expectations

- Remote-first role with required in-person meetings in Sacramento, CA.
- Must be available during standard Pacific Time business hours.
- Occasional schedule flexibility required to support project needs.
- Collaboration with distributed teams and multiple stakeholders is expected.

About Promethean One

Promethean One delivers mission-critical technology consulting across public safety, cybersecurity, and communications infrastructure. We specialize in solving complex problems at scale, helping organizations modernize systems, improve resilience, and execute high-impact programs.
