“All The News That’s Not Fit To Print” - February 2022 Edition

Our new Mayor has been in office for fifty days now, and has already revealed themselves to be an utter moron - as seems always to be the case, here in The City That Never Sleeps. **Hizzoner** has been carefully negotiating with the **United Federation of Teachers** in order to further integrate the Former Guy’s initiative for free universal pre-K citywide into their budgeting and planning when several top administrators had quietly hoped that might go away when the wrong corporate lobbyist got their butt into Gracie Mansion, and in order to get things straightened out there Hizzoner has had to over-promise lest he be seen under-delivering. Just one problem: the teachers aren’t the only union that had been considering a strike, and the police union has vampire hunters in it.

The combined efforts of **Clan Tremere** and **Clan Malkavian** have neatly put the **Technical Assistance Response Unit** into checkmate once again, revealing the TARU’s complicity in several recent homicides in the Times Square area perpetrated by officers from the **Midtown South** precinct as foot patrols there have been trying to look for vampires on the hunt, not corner drug deals and counterfeit purses. These officers from Midtown South seem to be working with some of the more radical elements of the **Night Shepherds** after they moved on from **Judson Memorial Church**, put out of operation months ago by Toreador Primogen **Maypop Sickle** and Clan Malkavian’s whip, **Agatha Palmerstone**. This isn’t the first illicit murder they have been party to and covered up - a body was found stripped naked and thrown into a dumpster just one block from Judson Memorial Church a year ago, after their utterly ignorant vampire patrols harrassed a drunk-and-disorderly citizen who’d just been a bit over-served in the bars down on Bleeker Street. The news media is working together on an exposeé of these abuses of authority and it’s expected to hit the front pages once all the Freedom of Information Act requests made to the **Civilian Complaint Review Board** have been disgorged and digested.

But while all of this is in the works, the NYPD as a whole is considering a sick-out in order to strengthen their bargaining position. They want their cushy arrangement with **Verify Point Media** back, letting them moonlight for \$45 in-uniform and even use their badge, gun and patrol car as rentable corporate assets creating what we used to call the **Central Park West Red Zone**. We have to navigate this moment carefully together, O Kindred Of New York, lest we snatch defeat from the jaws of victory.

In other news, we have received eyewitness news about another member of the **Movers and Shakers** coterie has come out with the reappearance of Ms. **Jacquelin Lane** of Clan Nosferatu. Ms. Lane had newly passed the Accounting in 2011 just before the mass disappearance event we are calling the **Beckoning** began, and like other members of that coterie of elders it seems Ms. Lane’s sire **Anne Rogers** of Clan Nosferatu can be confirmed among the missing. Of the four members of that coterie, including my grandsire **Wilhelm Dietrich**, it seems only Primogen **Frederick DeVries** of Clan Malkavian still remains with us. Clan Malkavian, guard your primogen well!

Your Illustrious Editor,
Alejandro D’Anconia
