Smartsheet Out-reach

V1

A college referred me to Smartsheet.

After using it I can say I love it. It's going to help me manage my time properly.

However, I noticed the activation email went straight to my spam folder.

I believe I have a secret that I can improve your landing page and the content on it.

Email marketing is going to skyrocket your revenue I assure you.

v2

Hey there,

I wanted to share my fantastic experience with Smartsheet, which a college recommended to me. I love it! It's a game-changer, helping me manage my time efficiently.

However, there's a slight hiccup. The activation email ended up in my spam folder. A quick fix can make onboarding smoother for new users.

If you want to generate leads, increase awareness, create a subscribers list, develop new business leads, and many more juicy opportunities I suggest it's about time you tackle this issue.

On another note, I believe I have a secret to share – a way to elevate your landing page and its content. My exploration of the platform has given me valuable insights to offer.

And let me tell you, email marketing is the key to skyrocketing your revenue! When done right, it works wonders for businesses.

Looking forward to hearing from you soon. Feel free to ask about my Smartsheet experience!
