Operations Meeting March 11, 2022

Attendees: Jeff D, Derek, Huijun, John, Shawn, Diego, Jeff P, Fabio
Apologies:

Fires

●

Announcements

● Diego is up on Freshdesk triage next week, Jeff P is up the following week
● Canceling Ops Call for Next week (OSG AHM!)
● Certificate DN changed and adjustments have to be done: SOFTWARE-4956
    ○ https://sectigo.com/resource-library/sectigo-implements-state-locality-exclusivity-for-public-ssl-certificates

Nebraska (Derek, John, Huijun)

● **GRACC**
    ○
● **OASIS**
    ○ hcc-cvmfs-repo ligo frailing (john looking into it)
● **OSG Status Page (https://status.opensciencegrid.org/)**
    ○
● **Check_MK - Alerting**
    ○ A bit wordy (alert'y), Derek going through with small cleanups.

Madison (Brian Lin, Jeff Peterson, Jason)

●

Hosted CEs

● Time to start shifting Hosted CEs to 3.6! 3.6-release, 3.6-testing, and 3.6-development tags should be available shortly https://github.com/opensciencegrid/docker-compute-entrypoint/pull/55
    ○ This is a go for more widespread usage for GLOW and OSG VOs per Jira: SOFTWARE-5037

- ○ Bosco path changes that will impact some overrides, and python3 loading for slum_submit wrapper
- GSU - waiting on response on Proxy info not working
- Tufts - adjusted GPU settings, still testing
- UIUC - Pascal setting up a meeting to talk it through with the site.
- ND_CAML LIGO GPU?

Tiger

- Cooling switchover with no issues, Discovery/Morgridge Datacenter back on campus chilled water

Frontends

- JLAB
  - ○
- LIGO
  - ○
- GLUEX

Chicago/Collaborations (Pascal)

-

Michigan (Shawn)

- Still working on transition to the new HTTP->Logstash archiver for perfSONAR. Have a working version but needs 1) scale testing and 2) more complete data translation to cover existing format in our Elasticsearch.
  - ○ Need to schedule a meeting with the perfSONAR devs to discuss options and note issues we have found. Shawn is working on scheduling some time next week.

UCSD (Jeff, Diego, Fabio)

MISC:

-

Central Manager

-

Frontends

- Still working on the UCLHC FE, managed to push the right token into the pilot but cannot make the pilot use it, plan B is to move FE to tiger (currently on PRP), cloning OSpool FE

Caches:

-

GWMS Factory

-

AOB
