

Sharing materials across two different organizational accounts

26 August 2020

Lehigh team started this: created groups that exist across SESI account and the Lankenau and du Pont accounts.

Basic idea:

1. Create the group. Must conform to certain constraints
2. Add members to the group -- the trick here is to turn off the toggle that restricts your users search to only members within your organization. That's the default; you need to turn it off
