

Facebook Post and Email Script for Budget Campaign

Did you know that diapers are not covered by federal government safety net programs?

California state diaper banks have seen an overall 406% increase in demand since the pandemic began. Diapers are expensive and no parent should have to choose between paying rent, food, or diapers for their baby.

Join me and Help A Mother Out and write to your CA state representative and ask for their support of CA Assemblymember Lorena Gonzalez's budget proposal to include \$30 million for diaper bank funding over the next 3 years. It will take you 5 minutes and make a big impact. You can find state representatives contact info, a short email template, and more details below.
