

Ceramics/Sculpture I

Cup & Saucer with a Theme

Design and create a functional or non-functional **CUP & SAUCER SET** that has a **THEME**. Create the most original, unique design you can imagine!

1. View slides of cups made by various artists.
2. Design an original, creative cup and saucer. The cup and saucer should fit together in terms of their design and also functionally if it's a functional piece.
3. Draw at least 4 detailed sketches including the form and the surface design. The surface design can use texture, color, adding clay pieces, or any other method, but it must have some surface treatment.
4. Construct your cup and saucer using the best construction method for your design—coil, slab, pinch or a combination.
5. The surface design may use any method you have learned so far (for example, sgraffito, texture, sculpting/adding clay).

EVALUATION CRITERIA:

- Cup and saucer are related to each other in a design sense
- Shapes/forms are integrated functionally and in design
- Forms constructed to proper thickness
- Surface design fits the theme
