

March 3,

1989

(name and address deleted)

Dear Sir:

This is a response to your Jan 9, 1989 letter.

I am the Richard C. Doty mentioned by Barry Greenwood of Citizens Against UFO Secrecy (CAUS). I did retire from Government Service last year. I spent eight years with the Air Force Office of Special Investigations at Kirtland AFB, NM. I was also assigned duty in West Germany. My last two years of service was in the Services career field, but not as a cook. I never lost my top secret security clearance. In fact my current position requires the clearance. I did do something wrong. While assigned to the AFOSI District 70 Headquarters, Weisbaden, West Germany, I performed duties as a counterespionage specialist. In 1986, I was involved in a sensitive operation where I attempted to perform certain duties which would enable our team to trap possible foreign agents working against the interests of the United States. My supervisors, however, seen my actions as being unauthorized. Therefore, I was asked to leave AFOSI, which I did voluntarily. I accepted a position at Kirtland AFB, in Albuquerque, NM, where my son was residing with my former spouse.

While assigned to duties with AFOSI at Kirtland AFB, NM, I did investigate a number of UFO sightings. However, my normal duties were that of an counterintelligence investigator. I did not devote my entire time to the conduct of UFO investigations.

At present, my job deals with investigations and I do work for a Government agency. However, I do not have anything to do with UFO research or investigations.

My own personal beliefs regarding the subject of UFO is this. I think Earth is not the only planet in the Universe that supports intelligent life. Whether Earth has been visited in the past by visitors from other planets I simply don't have enough information to make a personal decision. If I should base my decision on information that I had access to during my Government Service, I would have to say, yes, Earth has been visited. However, I am not 100 percent certain that the information I had access to was entirely accurate.

My father was never an investigator for Blue Book. That was an

uncle. He will be prominently mentioned in a book due out this fall.

This book will also discuss a number of inaccurate statements made by

CAUS regarding me, the Kirtland and Ellsworth AFBs incidents.

This

book will name people who CAUS says do not exist.

The last thing I would like to mention is the story that I am the

Falcon mentioned in the Television program last October. I have been

exonerated by Government Investigative Agencies regarding that matter.

I am not that person.

I presently no longer reside in New Mexico, but I do have a forwarding service in New Mexico. If you should respond to this letter

please allow approximately one month for my reply.

This matter involving CAUS will come to an end soon after legal

action has been taken.

Mr. Todd;

This is in response to your March 2 and 28 letters.

During the conversation with Mr. Klass in January 1988, I merely

expressed opinions regarding your association with certain documents.

I never stated I actually knew you retyped the documents you mentioned. Regarding the statement you sent forged documents to the

government. That again was an opinion. You sent me a document that you yourself said was forged.

Regarding the Ellsworth AFB incident. I have told Peter Gersten

and a number of other people the incident never happened. I never

was involved in any investigations regarding UFOs at Ellsworth AFB.

I have never interfered with the processing of FOIA requested during my assignment with AFOSI. I never handled an FOIA requests. They were handled by the Commander, who forwarded them to HQ AFOSI for special processing.

I have never attempted to discredit you.

I have won two legal actions against UFO researchers who made statements regarding my character. I am more that willing to pursue legal actions against you. In your March 2 and 28 letter, you made a number of statements that could be considered libel and slanderous.

I have no intentions of sending you a notarized statement. I merely stated opinions to Mr. Klass during the January 1988 conversation. The opinions I made during that telephone conversation are no different than the opinions you made to Peter Gersten and Mr. Greenwood in 1987, 1988 and early 1989. I know of several statement you made about me to those individuals and certain others. You must be more careful what you say.

I have been exonerated by Government investigators regarding the Ellsworth AFB incident, the Kirtland AFB incident, the Falcon affair, the document to MUFON and the Linda Howe affair. I went through a lot of time, trouble, expense and pain clearing myself of those allegations. I will now concentrate my efforts on clearing my name within the research community.

Regarding the book due out this fall. I was not the author of the book. A researcher in Seattle, WA did the research and a writer in New York wrote the book. I actually had very little to do with the book. In fact the manuscript was written before I knew anything about the book. The writer presented the manuscript to me for my comments. I must say there are a lot of truths about my career with AFOSI that was told, some against my wishes. However, the truths about the Kirtland AFB incident, the Ellsworth AFB incidents, the Linda Howe affair, and many other allegations made against me were answered in the book. Once you read the book, you will find out

the real truths about those incident I mentioned earlier. My uncle contributed a great deal to the last two chapters of the book. He gives a detailed history of UFO investigations from 1953 until 1969. The Seattle researcher did a lot of good work on the book. He found some, yet to be released, Government documents relating to the UFO questions. I can honestly say, I don't know how he got them. He also obtained some, never before released, Government documents through FOIA regarding UFOs. I must admit the book doesn't paint me as a saint, but it does tell the truth.

In closing, I don't know you personally. I don't make comments about a persons character that I don't know. I'm sure you are sincere in your research work. There is a lot of information out there regarding UFOs that needs to be sorted out. There are also a lot of unexplained questions that needs to be answered. If you wish to pursue the answers to the many UFO related questions, so be it. I truly wish you luck. It won't be easy.
