

Debenport

Principles of Education and Training

Week of April 20th and 27th

Week of April 20

You will be reviewing slide (content) from the unit “Jobs, Careers, and Education”. The first section will be “Education and Training”. Review the slides and consider the thought “high school is a good dress rehearsal for the work force”.

Consider:

- What education has to offer in order to prepare you for post secondary education or the work force.
- What you are getting from your education. Are you doing all that you can to be prepared for the what’s next?
- Are you networking? Getting involved, meeting people, forming relationships that could be useful in your future?
- Are you asking questions? What, say that again please? How does this help outside of the classroom? What careers use this?
- Do you really want to pay \$10,000 or more for an education you are not going to use after college?

Some of the material throughout the unit will be repetitive....I hope you remember it from the first grading period.

Assignment: Review the slides in the Education and Training section on or before April 27. There will be no paperwork to submit for this assignment.

Week of April 27

Assignment: Complete the quiz (paper copy or in Classroom) over Education and Training. Submit by May 4 through Classroom or as an attachment through email.
