

PostgreSQL and other database integrations:

- 1) Create Dragonchain watcher/publisher smart contracts such that an occurrence on a Dragonchain L1 triggers a change on a PostgreSQL database, and visa versa.

Note*** the PostgreSQL-->Dragonchain trigger is already claimed and near completion. The Dragonchain-->PostgreSQL trigger is still open, and reward for fulfillment is as follows:

\$800 in Dragons for completion

Additional rewards available:

- 5-10 minute-long video demonstration: \$150 in Dragons
- Clear and complete documentations: \$150 in Dragons
- 1200+ word blog article (we're able to help proofread and edit): \$150 in Dragons

Total reward available: \$1,250 in Dragons

- 2) Integration of stored procedures (any/all procedural languages) into Dragonchain as smart contracts. This would mainly involve a model wherein the stored procedure persists on a Dragonchain and verifies or installs via database API or CLI, and is callable via a Dragonchain transaction.

Base Integration Bounty: \$1,800 in Dragons

Additional rewards available:

- 5-10 minute long video demonstration: \$500 in Dragons
- Clear and complete documentation: \$500 in Dragons
- 1200+ word blog article (we're able to help): \$500 in Dragons

Total reward available: \$3,000 in Dragons

** We encourage developers to work together with the community and/or friends to include the demo, docs, and blog.*

One-time reward for 1) and 2). **Highlighted** project.

For Oracle, SQLServer, MySQL, MongoDB, CouchDB, Cassandra, Voldemort, Hadoop:

\$1000 in Dragons for each

Additional rewards available:

- 5-10 minute video demonstration: \$200 in Dragons
- Clear and complete documentation: \$200 in Dragons
- 1200+ word blog article (we're able to help here): \$200 in Dragons

Total reward available: \$1,600 in Dragons for each of the additional 8 requested (not exceeding \$12,800).

** We encourage developers to work together with the community and/or friends to produce the demo, docs, and blog.*

*** Number of Dragons we reward are defined as the earned dollar value according to CoinGecko's reports of Dragon value, in dollars, at (or very near to) the time of reward transfer(s).*
