

Coding with Pencilcode: Drawing Project

For this project, you will be creating a drawing in [Pencilcode](#).

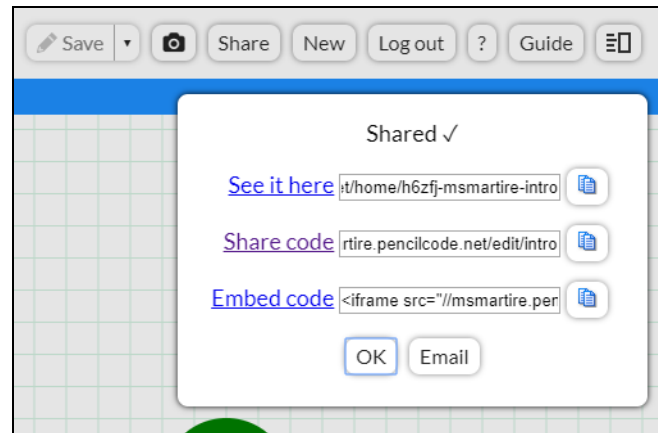

The drawing can be anything you want; however, the more difficult and detailed it is, the better your grade will be. In other words, don't draw a red square!!!

Here is an example from a past Digital Literacy student

- Netflix [Example](#)

When finished, share your saved drawing with me. Follow these steps to do this.

1. Click on the "Share" button.
2. Copy the link in the "See it here" box.
3. Email the link to your teacher in a professional email.

Use this table to help plan your drawing (optional)

What will your drawing be at the end? Be sure to be descriptive and include colors, sizes, etc.
List out the steps you need to begin your drawing. Make sure to be specific. Remember when we made the peanut butter and jelly sandwiches! Begin with the first 10.
