# TV Show Introduction Recreation

## using After Effects

### Introduction

In this assignment, students will precisely recreate an introduction to a news channel introduction or television show introduction using After Effects..

### Assignment

1. Create at least a 10 layer After Effects project. You may create layers in After Effects or you may create layers in Photoshop and import the files.
2. Must be at least 15 seconds in length.
3. Must have the news channel or television show title displayed.
4. The introduction chosen must use After Effects to its best capabilities.
5. Must animate each layer individually, using opacity, scale and position.
6. You will use the audio file from the chosen introduction. That is the only part of the introduction that you may use, everything else will be your creation.
7. You will render the file and add your creation and the original introduction to Haiku so that I can compare the two.

### Planning

Find an introduction to a television show that is 15-30 seconds.

1. What intro will you be recreating? Paste the URL

2. What is the length of the introduction?

3. How many scenes will you need to film?

4. What elements will you be adding? Animated shapes, images, text, 3D?

5. List the segments or sketch a storyboard of sequences:
