International Online Rally - 25th January 2021

260+ organisations from 18 countries have signed up for a call to action against the war on Yemen so far, making this the biggest international anti-war co-ordination since the campaign against the Iraq war.

Unfortunately, due to the circumstances in the wake of the Covid-19 pandemic all of the planned physical protests in the UK have had to be postponed but our global movement will not be silenced.

For the World Says No to War on Yemen Global Online Rally we have brought together a group of prominent voices from across the world to speak out against this utterly brutal war and call for its immediate end.

Global Day of Action on January 25th

The war in Yemen is the most egregious manifestation of the global arms trade since the World Wars. The UK, US and arms producing countries of Europe are complicit in the killing of tens of thousands of innocent Yemeni civilians, predominantly by the Saudi/UAE-led coalition, not as collateral damage, but in intentional targeting, and through the enforcement of the world's worst humanitarian disaster.
