

EMERJ

EMERGING MULTIDISCIPLINARY ENGINEERING & SCIENCES RESEARCH JOURNAL

Delete all gray instructional text before submitting. Text in this template follows the format required in the EMERJ Information for Authors; consult that document for full detail.

ARTICLE TYPE: *[Original Research / Review / Technical Note]*

RUNNING HEAD: *[Short title, no more than 60 characters]*

[Full Title of the Manuscript: Concise, Specific, and Descriptive of the Contents]

[First Author]¹, [Second Author]², [Third Author]¹

¹*[Department, Institution, City, Country]*

²*[Department, Institution, City, Country]*

***Correspondence:** [Corresponding Author Name], [email address]

ABSTRACT

[One paragraph, no more than 250 words. State the research problem or gap, the objectives, the methodology, the principal results with representative values, and the major conclusions. The abstract must be understandable without reference to the rest of the manuscript.]

KEYWORDS: *[keyword 1; keyword 2; keyword 3; keyword 4; keyword 5 — up to 5, alphabetical]*

1 INTRODUCTION

State the problem and provide sufficient background to set the work in context. Discuss related literature to establish similarities and gaps. Close this section with a clear statement of the study’s objectives.

[Introduction text goes here.]

2 MATERIALS AND METHODS

Provide enough detail for the work to be replicated. Cite previously published procedures rather than repeating them; describe only genuinely new procedures in detail. For studies involving human participants or animal subjects, report the approving body and protocol number. Specify manufacturer, model, and country of origin for equipment, materials, and reagents.

[Methodology text goes here.]

2.1 [Materials / Study Site / Data Source]

[Subsection text goes here.]

2.2 [Procedure / Experimental Design / Model Formulation]

[Subsection text goes here.]

[Equation, centered](1)

Number equations consecutively at the right margin, and define every symbol immediately after the equation.

3 RESULTS AND DISCUSSION

Present results and their discussion together, not as separate sections — each result should be followed directly by its interpretation. Avoid repeating the same data in text, tables, and figures.

[Results and discussion text goes here.]

TABLE 1 [Brief, descriptive table title]

[Variable]	[Condition A]	[Condition B]
[Row 1]	[value]	[value]
[Row 2]	[value]	[value]
[Row 3]	[value]	[value]

Tables should be self-contained, numbered consecutively, and captioned above the table. Use only three horizontal rules — below the title, below the column headings, and at the foot — and no vertical rules. Note units in the column headings, not the caption.

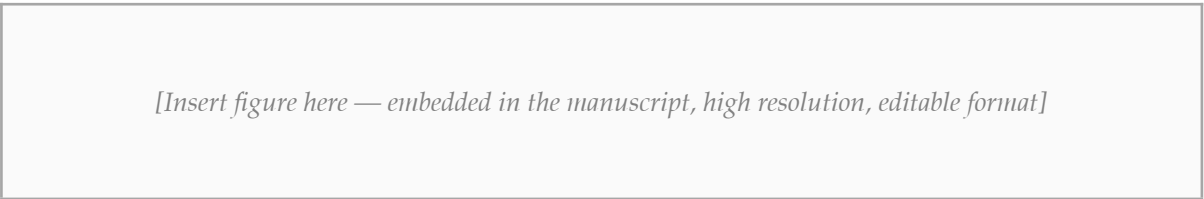

FIGURE 1 [Brief caption describing the illustration, placed below the figure]

Keep in-figure text to a minimum and set it in Times New Roman. Figures must be embedded in the manuscript, not placed in an appendix.

4 CONCLUSION

Summarize the study's contribution. Recommendations and directions for future work may be included.

[Conclusion text goes here.]

ACKNOWLEDGMENTS

Brief acknowledgment of funding, technical assistance, or similar contributions.

[Acknowledgment text goes here.]

AUTHOR CONTRIBUTIONS

[Name]: conceptualization, methodology, writing – original draft. [Name]: formal analysis, investigation, writing – review and editing. [Name]: supervision, funding acquisition.

AI USAGE DISCLOSURE STATEMENT

Disclose any generative AI or AI-assisted tool used in preparing this manuscript (e.g., for language editing, literature search, or coding assistance), naming the tool, its version, and its purpose. If none was used, state so explicitly. AI tools cannot be listed as an author, and the authors remain fully responsible for the accuracy and integrity of all AI-assisted content.

[The author(s) used [tool name and version] for [stated purpose]. All AI-assisted output was reviewed and verified by the author(s). / No generative AI or AI-assisted tools were used in the preparation of this manuscript.]

CONFLICT OF INTEREST STATEMENT

[The authors declare no conflict of interest. / Disclose any competing interests here.]

DATA AVAILABILITY STATEMENT

[State how the data supporting the findings can be accessed, or explain any restrictions.]

REFERENCES

List references alphabetically by author surname; every in-text citation must appear here and vice versa. See the EMERJ Information for Authors for full style rules and examples. Use APA 7th Citation format

[Author, A. A. (Year). Title of work. Journal Name, volume(issue), pages.
