

Task #1: Spotting Bullshit.

- Please watch  Calling Bullshit 1.4: What is Bullshit?
- Please watch  Calling Bullshit 2.1: Spotting Bullshit

Okay, so: how can you spot bullshit? Please list and discuss the presented ideas.

Task #2: Demographic Data Analysis.

Time to get real!

Let's data viz Questions 1-5 and put together a coherent and engaging data story as a slide deck or slidedoc.

- Focus on the interesting stories contained in the responses to each of the questions.
- Focus on putting the different charts together into a coherent and engaging narrative.
- Focus less on making each chart and slide 100 percent perfect - that can happen later-on.

Please note: this will take some time to complete: you will need to structure the data, deal with missing responses, the "Other" responses, calculate descriptive statistics, make a bunch of exploratory charts, decide on which chart type to use for your data storytelling chart, and then put it all together as a slide deck.

Deliverable.

Please send me the link to your slide deck.
Slide #1 should include Task #1.

Please contact me for help or clarification as needed!
