(Part-V Source Based Questions)

Note – Answer the following questions after reading the paragraph. Each question carries 2 marks. 10

Forests are very precious for us. They provide shelter to the animals and together they maintain the environment | Changes in climate and human intervention cause the loss of natural habitats for plants

and animals. Many species are on the verge of extinction or are threatened. Deforestation, soil erosion, forest fires, tsunamis, landslides are some of the human and natural factors that accelerate this process.

do Another major cause of animal extinction is hunting, which results in a rapid decline in the numbers of certain species of animals. | These animals are hunted for their feathers, skin, nails and horns etc. as a hobby and for illegal trade. These animals mainly include lion, elephant, bear, blackbuck, crocodile, snow leopard, ostrich and peacock. They can be saved by raising awareness about the maintenance of these animals.

1. How are forests valuable to us? 2
2. What activities are responsible for the destruction of forests? 2
3. What are the main reasons for hunting wild animals? 2
4. What are the causes of loss of natural habitats in forests? 2
5. What can be done to save forests and wild animals? 2
