

Changing Your Schoology Course Picture

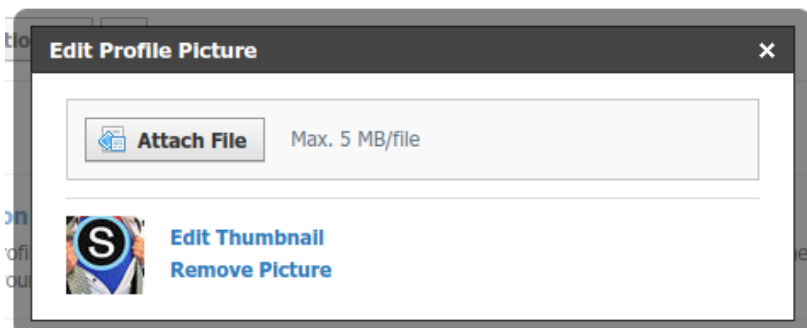

Changing the Course picture can be beneficial for both students and teachers as it provides a visual cue to aid in navigation of the Schoology system.

Anyone who has course admin privileges (typically teachers have course admin privileges of their own courses) can change the course picture.

- Hover over the upper left hand corner of the course. You should see an Edit Picture button appear.

- Select a picture from your computer to be the new course picture. The picture may not be larger than 5MB in size.
- Click on Attach File and navigate to the picture you would like to use as the course picture.

- You may Remove the Picture or Edit the Thumbnail in the Editing area as well.

Where you can you find course pictures? You can look up images to use or make a Google Drawing document! Just be sure that you use something with a [Creative Commons License](https://creativecommons.org/licenses/by/4.0/) that says you are free to use the image or get permission.
