

Privacy Policy for Poshmark AI Finder

Effective Date: April 30, 2026

Poshmark AI Finder is a Chrome extension designed to help users manage and review Poshmark-related workflow activity from their browser.

This Privacy Policy explains what information the extension may access, how that information is used, and how user data is handled.

1. Extension Purpose

Poshmark AI Finder helps users work with supported Poshmark pages in Chrome by providing workflow tools for scanning pages, reading page content, managing task status, and supporting user-started Poshmark actions.

Poshmark AI Finder is an independent browser extension. It is not affiliated with, endorsed by, sponsored by, or officially connected to Poshmark.

2. Information the Extension May Access

To provide its features, the extension may access or process the following types of information inside the user's browser:

Authentication Information:

The extension may check Poshmark session or cookie status to determine whether Poshmark-related actions can run in the user's signed-in browser session. The extension does not ask for, collect, or store the user's Poshmark password.

Website Content:

The extension may read content on supported Poshmark pages, including page text, listing information, buttons, links, images, and page structure. This access is used only to provide the extension's Poshmark workflow features.

User Activity:

The extension may process user-started activity inside supported Poshmark pages, such as scanning a page, starting or stopping workflow tasks, saving local task status, and remembering extension preferences.

Local Settings and Workflow Data:

The extension may store settings, preferences, task status, cached workflow information, and extension state locally in the browser using Chrome extension storage.

3. Information the Extension Does Not Intentionally Collect

Poshmark AI Finder does not intentionally collect:

- Health information
- Financial or payment information
- Personal communications such as emails, text messages, or chats
- Precise location or GPS information
- Creditworthiness or lending information
- Full browsing history unrelated to the extension's Poshmark workflow purpose

4. How Information Is Used

The extension uses accessed information only to provide and improve its single purpose: helping users manage Poshmark-related workflow activity from supported Poshmark pages in Chrome.

Information may be used to:

- Detect whether the current page is a supported Poshmark page
- Read relevant Poshmark page content for scanning and workflow tools
- Run user-started actions on supported Poshmark pages
- Save local preferences and task state
- Keep extension features working between browser sessions
- Support extension reliability and functionality

5. Data Storage

The extension may store settings and workflow state locally in the user's browser through Chrome extension storage.

This local data may include preferences, task status, workflow history, cached page/action state, and other extension settings needed for functionality.

Users can remove stored extension data by uninstalling the extension or clearing extension data through Chrome.

6. Data Sharing

Poshmark AI Finder does not sell user data.

Poshmark AI Finder does not use or transfer user data for purposes unrelated to the extension's single purpose.

Poshmark AI Finder does not use or transfer user data to determine creditworthiness or for lending purposes.

The extension is designed to use data only for its Poshmark workflow features. If any network communication is required for a Poshmark action, it is used only to support the user-requested workflow.

7. Third Parties

Poshmark AI Finder is not affiliated with Poshmark.

When users interact with Poshmark through their browser, their use of Poshmark remains subject to Poshmark's own terms and privacy policy.

The extension does not control Poshmark's website, servers, privacy practices, or account systems.

8. Cookies and Session Information

The extension may use Chrome's cookies permission to check whether the user has an active Poshmark browser session.

This is used so the extension can support features that require the user to already be signed in to Poshmark in Chrome.

The extension does not ask for the user's Poshmark password.

9. Remote Code

Poshmark AI Finder does not intentionally load JavaScript or WebAssembly code from remote URLs. Extension scripts are intended to be packaged with the extension.

10. Data Security

The extension is designed to limit access to data needed for its stated purpose. Users should only install the extension from trusted sources and should keep Chrome updated.

11. User Control

Users can stop using the extension at any time by disabling or uninstalling it from Chrome.

Users can also clear local extension data by removing the extension or clearing extension storage through Chrome.

12. Children's Privacy

Poshmark AI Finder is not intended for children under 13 years old and does not knowingly collect information from children.

13. Changes to This Privacy Policy

This Privacy Policy may be updated from time to time. Any updates should be posted on the same public privacy policy page used in the Chrome Web Store listing.
