GOD

**A Rigorously Scientific
Imaginative Adventure in
Physics, Philosophy,
Consciousness, and Theology**

by

Saul Celere

Levels

(As motivation please keep in mind that once you ascend to Level Seven you get to experience a one on One interview with God Himself!!! Please read only one Level per day, in order, and let the ideas have some time to make themselves at home within your mind. You won't be psychologically equipped to deal with meeting God face to Face if you haven't completed the preparatory Levels first. This Adventure does require some attentive and open minded reading, but most of the Levels are less than 5000 words. Thanks, all the best!!)

Level One

Intrinsic Consciousness and Free Will

At Level One we demonstrate how and why we can now be scientifically sure, at least beyond all reasonable doubt, that all the basic physical Energy and particles of our Universe are, and always have been from the very first moment of their existence, intrinsically conscious within themselves, just like you, formed out of nothing except such fundamental physical Energy and particles, are conscious within and throughout your physical self.

Also at Level One we show that all of the particles of our Universe are individual intrinsically conscious entities possessing **Limited Free Will**, which, in turn, proves that us humans, formed out of nothing but such particles as we are, also possess Limited Free Will.

This is essential to any meaningful proof, or theory, of God since, if we don't possess any Free Will and our Universe and human existence have all been predetermined since the beginning of Their existence, then the question of whether or not there is a God loses all of its meaning, at least for humans.

If our Universe is totally deterministic, then human life is absurd and meaningless.

Absurd because we experience every single moment of our existence as if we do possess Free Will; choose, 'Heads' or 'Tails', you experienced that choice as if it really was a Free

Willed choice that you consciously made; for actual reality to be so at odds with our naive conscious experience of it renders human existence absurd.

And human life is meaningless if our Universe is totally Deterministic since it is by way of our conscious choices and actions that we come to know ourselves and find the narrative of our lives meaningful; how can anyone be proud of themselves, for example, for anything they ever do if they never possessed any ability whatsoever to do otherwise? You can't.

Therefore, the most immediate burden on any proof, or theory, of God is to establish that humans do indeed possess Free Will which is exactly what we do at Level One. Enjoy!

Level Two: The Theoretical Physics of The Mind of God

At Level Two we show how to use **The Postulate of Intrinsic Consciousness** along with **The Principles of The Physics of Consciousness** to construct the world's first rigorously scientific theoretical models of the physico-conscious Mind of God.

 God, Level Two

Level Three: The Theoretical Physics of The Human Soul

At Level Three, we show how to use The Postulate of Intrinsic Consciousness along with The Principles of The Physics of Consciousness to construct the world's first rigorously scientific theoretical models of the physico-conscious Human Soul.

 **God, Level Three**

Level Four: The Theoretical Physics of The Gospel according to John

At Level Four we show how much light our new physics and theology bring to our understanding and faith in The Bible, and, specifically, we give a rigorously scientific interpretation of The New Testament's Gospel according to John.

 John

Level Five: Chess, Love, and the coming of World Peace.

'If man is five, if man is five...'

**Level Six: The Human Soul under
Hyper-Consumerism**

'Then the devil is six, then the devil is six...'

**Level Seven: The Theologue, a one on One
interview with God Himself!!!**

'And God is Seven, And God is Seven...'

"Therefore, keep watch, for you know neither

the day nor the hour."

Matthew 25:13

Theologue:
