

[Study: Wolves have plenty of great habitat – in Mexico](#) February 5, 2021

Payson Roundup

... AZGFD Assistant Director Clay Crowder hailed the new study, saying “Mexico contained 90% of the Mexican wolf’s historical habitat, so it is unjustified to force recovery entirely in the United States... there are an estimated 163 Mexican gray wolves in Arizona and New Mexico and perhaps 30 more in Mexico’s Sierra Madre mountain range..,
