

STEM STUDENT REQUIREMENTS

- Students must attend all mandatory orientations, meetings, and program-related events.
- Students must follow the required course sequence and maintain a high standard of academic excellence in both academic and STEM courses to fulfill all program requirements.
- Students must understand that failure of one course will result in a warning and parent conference and failure of two courses will result in dismissal from the STEM Magnet program.
- Students must participate in two academic competitions per year including mandatory participation in the science fair counting as one academic competition each year.
- Students must actively engage and participate in collaborative and extracurricular activities including membership in one Career and Technical Student Organization (CTSO) such as Skills USA, Robotics, or HOSA, etc.... specific to their pathway, each academic year.
- Students must complete a minimum of 10 Community Service hours per year, totaling 40 hours by the completion of their senior year. Documentation is required, and hours must be logged and adequate progress must be made each academic year. For Honors & High Honors, students must complete a minimum of 25 hours, totaling 100 hours of community service by their senior year.
- Students will complete a total of 40 Internship hours. Students are responsible for finding their own internships or participating in the GSU AFT Program during the Summer.
- Students will complete a STEM Senior Capstone Project and Presentation during the second semester of their senior year.
- Students must maintain and make entries in their STEM Journals. Expectations are provided at [STEM Journal Presentation](#)
- Students will adhere to the school's code of conduct and demonstrate respectful and responsible behavior.
- Students must understand that failure to meet the program's academic and behavioral expectations may result in reconsideration of their enrollment in the STEM Magnet Program.
