

COVID-19 Office Safety Protocols

Effective Date: April 1, 2022

STAR® is committed to protecting our clients, employees, and our communities from COVID-19. Toward that goal, and in consideration of guidance released by the U.S. Centers for Disease Control and Prevention (CDC) and a variety of public health authorities and professional organizations, STAR® will continue to implement increased safety protocols for clients and visitors to our offices.

At this time, individuals entering our offices are required to wear a mask while indoors. We ask that if you are experiencing symptoms related to COVID-19 to please refrain from seeking our services in-person until symptoms are gone. We also encourage individuals to receive COVID-19 tests when symptoms are present and to receive COVID-19 vaccinations.

Where to Get Tested

Visit <https://ldh.la.gov/index.cfm/page/3934> to locate an available testing site near you.

Where to Get Vaccinated

The federal government's online vaccines.gov site can identify vaccination sites anywhere in the country (or <https://www.vacunas.gov> for Spanish). Individuals also can text their zip code to "GETVAX" (438829) – or "VACUNA" (822862) for Spanish – to find vaccination locations near them.

The [CDC's website](#) offers a link to a listing of local health departments, which can provide more information about local vaccination efforts.

_____ I acknowledge that I have reviewed and understand the above COVID-19 safety protocols.
