Earthquake - Resistant Structure Design Project Summary _____ / 4

Name: _____

Planning:

1) Sketch your structure plan:

2) What design, or real life structure (if any), inspired your design? Explain where your ideas came from:

Reflecting on Your Earthquake Safe Structure…..

1) Sketch your final structure:

2) Explain why you chose this design. What elements of your design helped create an "earthquake safe" structure?

3) Describe the results of your final test. How did your structure hold up? Why do you think you got the results you did?

4) What changes would you make if you were to do this activity again?
