Help Me Find a Good First Issue and Contribute

Do you want to start contributing to the Cilium project, but don't know where to start? In this session, we will:

1. Set up your development environment
 2. Sort through good first issues on Github and find one that you are interested in
 3. Understand the context of the issue and discuss possible solutions
 4. Create your first PR 🎉

I Have an Idea for the Cilium Roadmap

Are you a user of Cilium and see something that is missing or do you know what the next big thing that Cilium needs is and want to discuss it with a maintainer. This is your opportunity to influence the future of Cilium and help us determine the future of the project

Help Progress my PR

Do you have a PR in progress, but are running into problems with CI or are not sure what a reviewer's comments mean? Work with the Cilium committers to progress your PR into a mergeable state.

Get Help with Your Talk or CfP About Cilium

You love Cilium and want to tell the world about it, but have never given a talk before or don't know where to start with your CfP. We can help you write and review your CfP so they are most likely to get accepted. We can also help you build your slide deck from previous talks

I want to discuss something else

If you have a topic but it doesn't fit into the categories above, let us know about it here

- Liz Rice, @lizrice, let's discuss what should be in the Cilium Project Meeting for the next KubeCon
- Sebastien Prune THOMAS @prune, let's discuss and meet, my PR was already merged
