

DEVELOPMENTAL ASSESSMENT OF YOUNG CHILDREN-2 (DAYC-2)

The DAYC-2 measures a child's developmental level in several areas which include physical development, both gross motor and fine motor, as well as adaptive behaviors, which reference self help skills. It is appropriate for individuals from birth to age 5 years 11 months. Direct observation as well as interviews are used to complete testing.

AREA	Raw Score	Standard Score	Percentile	Range
Fine Motor				
Adaptive Behavior				
Gross Motor
