

Cheap Samsung Mobile of 2021 You Should Buy in 2022, Models, Prices, Opinion, Comparison, Characteristics

This is a buying guide; here, we help you decide which cheap Samsung mobile phones of 2021 to buy in 2022. We will show you the most affordable models, their prices, our opinion about them, all their characteristics, and a detailed comparison between them.

Samsung mobiles are very attractive, mainly because they are not Chinese but Korean. They come with a series of very interesting advantages at the security level, at the UI layer level, and the level of the pre-installed applications. In short, Samsung offers cleaner and safer [mobile phones](#) than Chinese mobiles.

1. Samsung Galaxy A22 mobile, € 199

This is the best-selling Samsung mobile on Amazon, that is because its relationship between quality and price is very good, it is surprising that only for **€ 199** you get a storage space of 128GB, without a doubt it is at the level of **Redmi mobiles** or **Realme** in terms of price, it is an excellent purchase option.

Samsung Galaxy A22 Features:

- Indeed, it does not have a FullHD + resolution, but its quality is spectacular. 6.4 " AMOLED HD + screen with 600 nits of brightness at 60hz. The brightness is so good it has is ideal to see everything perfect in broad daylight; it is a panel much superior to the IPS that Redmi models mount.
- Helio G80 processor is a mid-range but very powerful CPU, achieving 200,000 points in [Antutu](#).
- 48Mpx main camera with the optical stabilizer is normally reserved for the high-end, there is no Redmi mobile for this price that carries it, it has left us pleasantly surprised.
- Quadruple rear camera: 2mpx macro camera, 8mpx wide angle camera, 2mpx depth camera and 48mpx main camera.

- 13 mpx selfie camera.
- Battery 5000 mAH charged to 15w.
- 4GB RAM and 128GB of memory.
- DUAL SIM and microSD slot
- Headphone jack.
- NFC

In our opinion, the Samsung A22 is the cheap model of 2021; it has several unique features: 128GB storage, optical image stabilizer, Super AMOLED screen, 5000 mAh, and the Samsung One UI layer; all these features stand out over the range models. Xiaomi media.

2. Samsung Galaxy M11 mobile, € 138

This is the cheapest Samsung mobile of 2021. if you have a tight budget but want a Samsung mobile, you should go for this option, it is a basic range, but it has some mid-range points, such as its screen with a hole in it. screen, the 5000 mAh battery, or the triple rear camera.

Samsung Galaxy M11 Features:

- 6.4 " IPS HD + screen with a hole in the screen, the design with the hole in the screen is a real highlight. It really looks like a high-end mobile.
- Snapdragon 450 processor, a Qualcomm brand mid-range CPU, as you can see it is very far in performance compared to the Helio G80, so do not expect spectacular benefits either.
- Triple rear camera: 13mpx main camera, 5mpx ultra wide angle camera and 2mpx depth camera.
- Battery 5,000 mAh.
- 3GB RAM and 32GB of internal memory.
- NFC
- Headphone jack
- Dual SIM and MicroSD slot.

It is a basic mobile but very cheap, be careful because perhaps the 32GB of memory is short, the processor's power is not to shoot rockets, and the cameras are very basic. Still, the truth is that for **€ 138** you get a whole Samsung with the good work of this company.

3. Samsung Galaxy M12 mobile, € 175

This is one of the most balanced cheap Samsung 2021 mobiles. It combines an excellent design with metal finishes with very decent features; let's say it is in the middle between the Samsung A22 and the Samsung M11, so it can be a very interesting option.

Samsung Galaxy M12 Features:

- 6.5 " TFT HD + screen, a simple screen but of very good quality, we could say that it is a typical mid-range mobile screen
- Exynos 850 processor is a Samsung brand mid-range processor, it offers good performance.
- Four rear cameras: 48.0 MP + 5.0 MP + 2.0 MP + 2.0 MP , the 48mpx main camera does not have an optical stabilizer, but it does achieve very good results.
- Battery 5,000 mAh.
- 4GB RAM and 64GB of internal memory.
- NFC
- Headphone jack.
- Dual SIM and micro SD slot.

For € 25 more, I would buy [the Samsung Galaxy A22](#). Just for that small difference, you get a much better mobile with AMOLED screen, double the internal memory, camera with an optical stabilizer, much more powerful processor...

4. Samsung Galaxy A12 mobile, € 190

As you will see, the A12 is a model very similar to the Samsung Galaxy M12 seen in the previous section, now, for € 190 it offers you 128GB of internal memory, so in relation to quality and price perhaps it is somewhat higher, so that is why we have it included in this comparison.

Samsung Galaxy A12 Features:

- 6.5 " TFT HD + screen, as you can see, it is exactly the same screen as the M12 model.
- Helio P35 processor, in terms of power it is very similar to the Exynos 850 of the M12.
- Four rear cameras : 48.0 MP + 5.0 MP + 2.0 MP + 2.0 MP , again it has the same sensors as the Samsung M12.
- Battery 5,000 mAh.
- 4GB RAM and 128GB of internal memory.

- NFC
- Headphone jack
- Dual SIM and MicroSD slot.

Here again, the recommendation is the same as the [Samsung Galaxy A22](#). Again everything you earn by paying this extra money is spectacular.

5. Samsung Galaxy A32 mobile, € 229

This Samsung A32 has a screen that goes to the next level. Its 64mp camera is one of the best on this list. Also, this mobile has an ultra-thin and light design, without a doubt it is a jewel you will enjoy a lot. This mobile already makes you doubt whether to buy the **Samsung A22** or the A32.

Samsung Galaxy A32 Features:

- Screen 6.4 " Super AMOLED FullHD + 800 nits, here we have a screen that is on another level, it has more resolution and brightness than the Samsung A22, I would almost choose this mobile for this screen.
- Helio G80 processor, a mid-range processor capable of everything, without a doubt it can handle all kinds of advanced apps and games.
- Four rear cameras: 64.0 MP + 8.0 MP + 5.0 MP + 5.0 MP
- Camera selfies 20 mp.
- 5000 mAH battery , with 15w fast charge.
- 6GB RAM and 128GB of internal memory.
- NFC
- Headphone jack
- Dual SIM and microSD slot.

If you want an incredible screen, choose [Samsung A32](#). Still, suppose you want a camera with a stabilizer, then better the [Samsung A22](#). In that case, it is difficult to choose between one and the other mobile. The two are very balanced, worse, of course, the screen of the Samsung A32 is at another level, already which has higher resolution and better brightness.

Samsung Galaxy A52 mobile, € 360

The [Samsung Galaxy A52](#) is a premium mid-range, this mobile combines the screen of the **Samsung A32** with the camera of the **Samsung A22**, so the result is very good, this mobile combines the best screen and the best camera of this comparison, it is for this also has such a high price.

Samsung Galaxy A52 Features:

- 6.5 " Super AMOLED FullHD + screen at 90hz, not only does it have the best screen, but it also goes to 90hz, while the refresh rate of the other mobiles on this list is only 60hz, so it is the mobile that offers the most experience.
- Snapdragon 720G processor is the most powerful CPU on this list. When the rest of the processors on this list are 12nm, it is the most efficient.
- 64mpx main camera with optical image stabilization, only the Samsung A22 has.
- 4 camera sensors: 64.0 MP + 8.0 MP + 5.0 MP + 5.0 MP
- 4500 mAh battery with 25w fast charge.
- 6GB RAM and 128GB of memory.
- IP65 water-resistant.
- NFC
- Headphone jack.
- Dual SIM and microSD slot

This is the most powerful mid-range Samsung mobile in 2021, it surpasses all the rivals on the list, it has more power, it has better cameras and a better screen, although its price is quite high and we do not know if it is worth paying so much for it, in our opinion, the Samsung A32 is more appealing because it has a better quality-price ratio.

Conclusion

Searching among the different Samsung smartphones is a good option to acquire devices at a good price. Their hallmarks are the quality of the brand they treasure and the variety of functionalities. Before choosing one of its models, it is advisable to identify several important factors and characteristics. The choice should respond to your needs, preferences, and budget.

If you still don't know which cheap Samsung to choose, the great idea is to expand your information. For this, we recommend platforms such as [Mobile Ki Site](#), where you will find several models of this brand, their descriptions, the different opinions of users, and whether or not they are on sale.

We hope you liked this comparison and that you found the best affordable Samsung mobile for your day-to-day.
