Target	Ireland (IE) — branded + commercial intent

Cuba Nicotine Pouches — Bold Flavours, Serious Strength

Cuba is a nicotine pouch brand that doesn't really cater to beginners — and that's kind of the point. Made by NICOTOBACCO in Poland, Cuba has built a reputation across Ireland and the rest of Europe among experienced users who want high-strength, tobacco-free pouches with genuine flavour behind them.

We stock the full Cuba range — White, Black, and Ninja — with fast delivery across Ireland.

What Are Cuba Nicotine Pouches? The Real Story Behind the Brand

You put Cuba pouches—slim, white nicotine pouches—under your top lip. Each one releases nicotine and flavour gradually — no smoke, no tobacco, nothing to light. The 'snus' label gets

used a lot with Cuba, but Cuba isn't traditional snus. Traditional snus has tobacco leaf in it. Cuba uses pharmaceutical-grade nicotine, plant fibre, and food-grade flavourings instead — no tobacco in any of the products. What actually makes Cuba different is where it sits on the strength scale. The White line starts at 16mg per pouch — already strong by most market standards — and the Black line runs all the way up to 66mg. These aren't everyday casual pouches.

Cuba White vs Black vs Ninja — Which One Is Right for You?

Cuba organises its range by canister colour. Every color corresponds to a distinct strength tier, and the difference between them is important enough to consider while making a decision.

Range	Nicotine	Pouches/Can	Best For
Cuba White	16mg	20	A strong starting point — suits users stepping up from mid-strength brands
Cuba Ninja	30mg	25	A step between White and Black — more pouches per can, bolder hit
Cuba Black	66mg	20	Experienced users only — fast-acting, intense, not for beginners

Cuba Snus Flavours — Cola, Peach, Pineapple, Strawberry & More

The Cuba flavour range is one of the more varied options at this strength level. Fruit and candy flavours lead the lineup, which works well given how intense the nicotine delivery can be — the sweetness balances it out.

Flavour	Available In	Profile
Cuba Cola	White & Black	Sweet, fizzy — one of the most popular picks across both lines
Cuba Peach	White & Black	Ripe, natural fruit — smooth and clean
Cuba Pineapple	White & Black	Tropical, slightly sharp — refreshing

Cuba Strawberry	Ninja	Sweet berry, candy-like — works well at the 30mg level
Cuba Black Currant	White	Dark berry, mildly tart — a quieter option in the range
Cuba Double Fresh	White & Black	Strong mint blast — sharp and cooling
Cuba Banana Hit	White	Sweet banana candy flavour — unusual but popular
Cuba Watermelon	White & Black	Juicy, summery — lighter on the palate

In both the White and Black lines, Cuba Cola and Cuba Peach continuously do well. Cuba Pineapple brings a tropical sharpness that works surprisingly well at higher strengths, and Cuba Strawberry in the Ninja range has built a solid following of its own. Banana Hit is the one that sounds odd until you actually try it.

- Multi-buy pricing available

Shipping to Dublin, Cork, Galway, Limerick, and everywhere else across the country.

Cuba Nicotine Pouches — Questions People Actually Ask

Is Cuba the same as snus?

Not exactly. Because of the way they are used—tucked under the lip—Cuba nicotine pouches are frequently referred to as "Cuba snus," however actual snus contains tobacco leaf. Cuba doesn't. It's made with pharmaceutical-grade nicotine, plant fiber, and food-grade flavorings, with no tobacco involved.

What is the difference between Cuba White, Cuba Black, and Cuba Ninja?

The colour of the canister indicates the strength tier. Cuba White sits at 16mg per pouch — still strong by most brand standards, but the most approachable in the Cuba range. Cuba Ninja

lands at 30mg with 25 pouches per can, making it better value and a clear step up. Cuba Black is 66mg — fast-acting and intense, intended strictly for experienced users.

Where in Ireland can I find Cuban nicotine pouches?

Cuba isn't widely available in physical shops across Ireland. Your best option is online, where you get the full range — White, Black, and Ninja across all flavours — with next-day delivery across the country.

How long does a Cuba pouch last?

Most users find between 30 and 45 minutes is the sweet spot, though Cuba Black tends to release faster given its higher nicotine concentration.

Is it legal to use Cuban nicotine packets in Ireland?

For adults who are at least eighteen years old, it is completely lawful. Cuba pouches contain no tobacco, so they fall outside tobacco product regulations in Ireland.
