

Blades and Coring Equipment in Chicago

Meta Description (155 characters):

Shop concrete, metal, and ductile iron blades in Chicago—abrasive, diamond, and carbide blades plus core drills and accessories for professional contractors.

At [A&A Equipment and Supply](#), we stock contractor-grade cutting and coring tools for sewer, water, and concrete professionals across the Chicago area. Our blade and core equipment lineup covers everything from ductile iron pipe cutting to deep-core concrete drilling, all sourced from industry-leading brands known for precision, performance, and safety. We also carry a wide range of [commercial-grade products](#) for all of your construction needs.

Whether you're cutting, grinding, or coring, A&A Equipment and Supply delivers the right tools to keep your crews working efficiently and your cuts clean.

Abrasive Blades for Cutting Wheel

Our abrasive blades for cutting wheels are engineered for durability and precision in the toughest cutting environments. Perfect for metal, steel, ductile iron, and concrete applications, these blades maintain consistent cutting depth and edge quality.

We offer abrasive blades from leading brands: CGW, Continental, and Tyrolit.

- **Blade Sizes:** 14" and 16" diameters
- **Arbor Options:** 20mm and 1"
- **Applications:**
 - **Metal and Steel Cutting** – For fabrication, demolition, and utility work
 - **Ductile Iron Cutting** – Designed for water main and sewer pipe applications
 - **Concrete Cutting** – Delivers smooth, fast cuts through cured concrete and masonry

These high-performance blades deliver dependable cutting accuracy and longevity, making them an essential choice for contractors and utility crews working in demanding conditions.

Diamond Blades

For the most demanding cutting jobs, our diamond blades provide unmatched speed, precision, and blade life. Designed for both dry and wet cutting, these blades handle everything from cured concrete to asphalt and masonry.

Available from: [Diamond Products](#):

- **Dry-Cutting Blades** – General-purpose, high-speed, and turbo-segment options
- **Concrete and Masonry Blades** – Optimized for long life and consistent depth control
- **Asphalt and Green Concrete Blades** – Specialized segments for soft aggregates and abrasive materials
- **Premium and Professional Series** – Engineered for heavy commercial and highway use

Engineered for precision and endurance, these diamond blades deliver professional-grade performance on every cut, ideal for contractors tackling Chicago's toughest construction and roadwork conditions.

Carbide Blades

Carbide-tipped blades are precision tools crafted for demanding cutting applications. These high-performance saw blades deliver exceptional durability, heat resistance, and clean cuts, making them ideal for roofing, demolition, and heavy-duty cutting tasks.

Carbide blades can be used in table saws, circular saws, miter saws, and handheld cutters. The key is matching the blade's specifications (diameter, RPM rating, arbor size) to your tool.

We offer carbide blades from [Oshlun](#):

- **12" Rescue Blade** – Ideal for roofing contractors, offering fast, controlled cuts through shingles, wood, and composite materials
- **Carbide Tip Design** – Extends blade life and improves cut stability
- **Cross-compatible** with most high-RPM saws and handheld cutters

Our carbide-tipped blades combine speed, precision, and long-lasting performance, making them an essential choice for contractors who demand clean, consistent cuts in the toughest roofing and demolition conditions.

Coring Drills and Accessories

A&A Equipment and Supply carries the complete line of Diamond Products Core Rigs and accessories, engineered for reliability, safety, and precision on the jobsite.

Our core drills and accessories are from [Diamond Products Core Equipment](#):

- Handheld, rig-mounted, and hydraulic core drills
- Wet and dry drilling systems
- Vacuum bases, anchors, and carts for stable mounting and positioning
- Extension shafts, adapters, and stands for versatile jobsite setups
- Accessories: Water tanks, slurry collectors, and replacement bits

Built for accuracy and endurance, our coring drills and accessories deliver professional-grade performance on every project, helping contractors achieve clean, precise cuts through concrete, asphalt, and masonry with confidence.
