mi PLACE Move In

www.miplacek12.org

Log in for the first time:

1. Before going to mi PLACE, use your browser to log in to your school (or personal) Google account. This is the Google account you'll use in mi PLACE.
2. Go to http://www.miplacek12.org
3. Click on the red Google button to log in, use your school email address and network password (or personal Gmail address and password).
4. Give mi PLACE permission to use your Google username for mi PLACE
5. Complete the profile screen

Explore a bit:

1. Use the green tabs to go to various places in the site
    a. Course Hub - curated resources and professional learning
    b. Groups - groups to join (or create), resources shared by members
    c. The ClassifiEds - want ads and responses
    d. My Learning - links to your groups, your courses, your profile, etc.
    e. Member Directory - find other mi PLACE members
    f. About mi PLACE - a description of the platform, community guidelines, mi PLACE team, privacy policy and terms of service

    NOTE: Site navigation is still being polished, so in a few places it's not always easy to go directly from one space to another--if you get stuck somewhere, just rely on the green tabs to navigate.

Join our group:

1. Click on the green tab for the Groups
2. Search for the "Leveraging Mathematical Language to Increase Equity of Access & Opportunity" group
3. Click on the group name to request to join
4. Since this is a Private group, Gerri or Suzanne will need to approve your request and then you can enter the group
5. Explore the folders so you can have an idea of the resources available in the group.
6. We will do all of our work for this project via our miPLACE group
