Metadescription: Get clear, up-to-date pricing on rewiring a house or upgrading an electrical panel in Oklahoma.

How Much Does it Cost to Rewire a House/ Upgrade Electrical Panel in Oklahoma?

How much does it cost to rewire a house or upgrade an electrical panel in Oklahoma? The answer depends on several key factors, including the size and age of your home, the condition of existing wiring, and the amperage of the new panel.

On average, full home rewiring can range from \$10,000 to \$30,000, while an electrical panel upgrade typically costs between \$1,500 and \$2,800. These prices are subjected to changes based on labor rates, choice of material, and code requirements in your specific area.

[Catale Electric Company](#) provides homeowners and businesses across Northeast Oklahoma with clear and upfront pricing with professional services that you can trust.

What Affects the Cost of Electrical Work?

When considering how much does it cost to rewire a house or upgrade an electrical panel, several important factors come into play. The things that affect the cost of electrical work include:

- How old or new your house is
- The type of panel you choose
- Complexity of your current wiring system
- Accessibility for electricians
- Labor cost
- Material costs.

A local permit is also required to begin work. The condition of your current wiring may influence how much work your electricians will need to do, all of which could either raise or significantly reduce the cost of rewiring a house in Oklahoma.
