

This is a breakdown of Cultivation's real name Koravellium (spelt K-o-r-a-v-e-l-l-i-u-m) into Aons (from Elantris).

No known Aons with "u" or "v"

"**Kaa**" means plants. Corresponds with the "K" in her name. Example: Kaa plantation.

Comment: Cultivation is associated with nature. I GASPED when I looked at the Aons & wanted to see how many Aons correspond to parts of her name.

"**Ore**." Associated with the "K" in her name. No meaning given. Example: Ore Plantation.

"**Rao**" means spirit, essence. Corresponds to the "r-a" in her name .

Comment:

- 1) In Oathbringer, Dalinar says "Some people identify her with Roshar, the spren of the world itself."
- 2) Ten Essences is the traditional Vorin term associated with both Soulcasting properties. Soulcasting involves manipulating the Surge of Transformation to turn one material into another.

"**Are**" means "unity, cohesion." Corresponds to the "a-v-e" in her name, but there are no v's in the known Aons.

Comment: Willshapers have access to cohesion. In RoW, Venli heard a female voice that accepted her ideal. Whether it was the Nightwatcher or Cultivation, it's an association with Cultivation.

Other people: Dalinar and Ishar both have ar in their names and they are bondsmiths and Dalinar's theme is unity.

"**Ela**" means "focus, center." Corresponds to "e-l" in her name. Examples: elantris, elao

Comment: Geographically, the Valley which is the home of Cultivation is located in the mountains of Ur which lie in the center of the Rosharan supercontinent.

"**Lir**" means "strength." Corresponds to "l-i" in her name.

Comment: She is a powerful being on Roshar. Strength can also be defined as "intensity of light, color, sound, or odor."

For the "m" at the end, it either corresponds to the aon "Omi" meaning love and "Mai" meaning "Honor."

Omi and Mai comments: These were the only one with "m" and can possibly fit.

my joke comment: love and honor?!?! Coincidence I think not!!!!

Now we'll focus on her other names!

I clipped a page of the Alethi glyphs pages where it says "Unknown glyph, but reads "koradaros" or "Koravari's light" obviously referring to Koravellium Avast, She Who Brings the Dews at Dawn.

Other names: "koradaros" "Koravari"

Similar Aons to Koravellium: "kaa" "are" "ore" "rao"

The new Aon.

"**Daa**" which mean "power, energy"

Comments: Investiture is the energy that infuses the cosmere

Yotsuba reaction in the corner. Yotsuba is trying on a helmet, but I added a tin foil hat. The bike shop owner says "This is very unhinged of you." Yotsuba says "Yeah, that's just how I am."

Text says "In conclusion" followed by a meme of a crazy man in front of a board of papers with crisscrossing marks. He's trying to explain his findings but he comes off as crazy.

Tagline: this doesn't seem like a coincidence
