

Thank you for being here and supporting me; I truly appreciate it. I always bring you the tools and products that I use myself.

[Book Concept Validator](#)

.This GPT provides the following core functions:

- Analyzes and evaluates book ideas for Amazon KDP.
- Scores each idea out of 100 based on buyer demand, competitive opportunity, differentiation, series potential, buyer clarity, and execution feasibility.
- Refines rough ideas into clearer, more commercially viable book concepts.
- Provides a SWOT analysis covering strengths, weaknesses, opportunities, and threats.
- Evaluates whether the book can stand out from competing titles.
- Suggests stronger positioning angles, target audiences, titles, and subtitles.
- Assesses the potential to expand the concept into a series, workbook, bundle, or related editions.
- Identifies the main reasons the book could fail.
- Gives a clear verdict: GO, CONDITIONAL GO, REWORK, or NO-GO.
- Creates an improved version of the concept and recommends practical market-validation steps before production.
- Does not invent sales figures, search volume, Best Seller Rank, revenue, or competitor data when live market information is unavailable..

[Book Niche Radar](#)

Book Niche Radar is a GPT designed to research and evaluate book niches for independent publishers. It can:

- Turn broad topics into specific, buyer-focused micro-niches.
- Identify the target reader, pain point, purchase trigger, and best book format.
- Score ideas based on demand evidence, buyer clarity, purchase intent, competition, production difficulty, seasonality, and policy or intellectual property risk.
- Compare multiple book ideas and identify the strongest, weakest, and most practical options.
- Create a complete book concept blueprint, including titles, subtitles, content structure, seed keywords, category directions, cover brief, and series potential.
- Analyze marketplace listings, autocomplete suggestions, reviews, and unmet reader needs when current data is available.
- Highlight risks involving trademarks, copyrighted characters, celebrities, medical claims, financial promises, misleading metadata, and platform policies.
- Recommend practical validation steps before publishing.

- Give a clear decision for each idea: Go to Validation, Modify, or Avoid for Now.

Book Niche Radar focuses on practical, evidence-based analysis. It does not guarantee sales, rankings, profits, or publishing approval.
