Description: The Lurie Center for Autism at Mass General is designed to evaluate and treat children, adolescents, and adults with a wide variety of neurodevelopment conditions. Autism, developmental and intellectual delays, Angelman syndrome, Fragile X syndrome, Rett's syndrome, Tuberous sclerosis, Tourette's disorder, and Williams syndrome are just some of the neurological conditions the Lurie Center is designed to treat. Their specialized doctors provide evaluation, psychiatry, neurology, gastroenterology, psychopharmacology, occupational therapy, physical therapy, and speech/language therapy.

Note*: (Services at Lexington, MA location: Treatment of autism and autism spectrum disorders, Asperger syndrome and developmental delays. Initial setup must go thru Mass General's Main Line)

- [Think: Kids, Boston, MA](#)

Website: www.thinkkids.org

Description: Think: Kids teaches a revolutionary, evidence-based approach called Collaborative Problem Solving (CPS) for helping children with behavioral challenges. Through training, support, and clinical services, we promote the understanding that challenging kids lack the skill, not the will, to behave well – specifically skills related to problem solving, flexibility and frustration tolerance. Unlike traditional models of discipline, the CPS approach avoids the use of power, control and motivational procedures and instead focuses on building helping relationships and teaching at-risk kids the skills they need to succeed.
