Frontends

- JLAB
  -
- LIGO
  -
- GLUEX

Chicago/Collaborations (Pascal)

-

Michigan (Shawn)

- Have updated the Logstash configuration for the new http archiver (=> Logstash) and have test_* versions of the indices.　Still need to verify we have all current data from RabbitMQ recreated in the new pipeline
- The v4.4 perfSONARs still have issues with a little less than 50% properly responding to the configuration to use the HTTP archiver.
  - Plan is to upgrade some failing production instances to v5 beta to see if that fixes the issue.

UCSD (Jeff, Diego, Fabio)

MISC:

-

Central Manager

-

Frontends

- UCSD CMS:
  -

- UCLHC
  - Fixed submission to UCI (by restarting condor-ce) and re-registered new cert (DN changed) on atlas's voms

Caches:

-

GWMS Factory

- Updated condor tarballs to 9.11.0 for pilots
