Stanton Freidman interviewed in the fortnightly paranormal collectable "The X-FACTOR" it is billed as covering, cover - ups, paranormal, Mysteries and UFO's. He was interviewed in the first edition which I purchased on the 28th dec. 1996.

Claims

1) Believes there were two crashes near Roswell in 1947, one at Corona, leaving a large amount of debris, and a second crash 240 km away to the west on the plains of San Augustin, this crash left a large metallic object stuck in the ground. It then goes on to show a artists impression of the saucer based on Freidmans eye - witnesses reports. No direct quote is available as this is stated in a section headed "CASE notes" and is not a quote from Freidman.

2) He goes on to say : -

"I've now interviewed over 200 witnesses, of whom 30 were involved with the discovery, recovery and subsequent cover - up of both crashes in New Mexico in 1947"

3) He then says : -

"And I've provided testimony to Congressional hearings in 1968 and at the United Nations in 1978."

When asked : -

"What kind of reaction do you get when you speak to government bodies?"

4) When asked about MJ - 12 he says after a brief summary : -

"I've even collected \$1000 from one critic for proving him wrong about the typeface on one of the MJ - 12 documents."

5) On the subject of alien abductions he says : -

" Yes, some people have been abducted, but you cannot make a blanket statement."

6) In a sub section called "View POINT" his view point is put across on Santilli's autopsy video, but unlike the over sub section (see point 1) there are two quotes:-

"nothing in it was associated with a crashed saucer at Roswell or anywhere else. Nothing matched."

"He's refused to have the film or details of the cameraman verified. Where's the evidence?"

7) When asked if being a scientist is a help or hindrance in UFO research he says, amongst other things : -

"Also, because virtually everything I worked on as a scientist was classified, I had a chance to understand how

security works. I wrote classified documents. I had a security clearance."

This fortnightly serial cost 0.75UKP but as the next issues price goes up to 1.75UKP I doubt if I shall be wasting my money on it again.
