

Game Instructions:

To begin the game, shuffle with the blank side face up and put the deck in the middle. Make sure the amount of Slide Killers and Doctors correlates with how many players are playing.

| Amount of People | Slide Killers | Doctors | Villagers |
|------------------|---------------|---------|---------------------------|
| 5 | 1 | 1 | 8 |
| 10 | 2 | 1 | 16 |
| 15 | 3 | 2 | 25 |
| 20* | 4 | 3 | 33 |
| 25 | 5 | 4 | 42 |
| n | n/5 | n/5-1 | n*2-Slide Killers-Doctors |

Each player draws two cards. Each player shall then check both of their cards to see which role(s) they have. You may have any combination of roles. The Slide Killer overrides Villagers and Doctors, so if you have a Slide Killer card you are a Slide Killer. The Doctor card overrides Villagers but not Slide Killers. Keep both cards, as you can use them to hide your identity. If one person has more than one Doctor card, reshuffle and redeal.

Slide Killer Rules

If either card has an S, you are a Slide Killer. Your goal is to eliminate the other players without getting detected. Watch out though! One of them could be a fellow Slide Killer. To kill someone, slide the card with the S on it to a player. The player will then soon perish. You may also have a villager or Doctor card. You may show it to people instead of the S to hide your identity.

Doctor Rules

If either card has a D and you don't have an S card, you are a Doctor. Your goal is to keep everyone alive long enough to hopefully find the Slide Killer. If you think someone has been poisoned (shown an S card) you can slide them the D card and they are saved you may also save yourself. You may only heal twice, including yourself. Once used twice, a Doctor card becomes useless; you are not allowed to use it again and must use the other card. Beware though, if you flash to a Slide Killer, they can try to kill you.

Villager Rules

If both your cards have V's, you are a villager. Your task is to go around and mutually show your card to people as your way of social interaction. Be safe!

Once you know your identity, choose someone to secretly slide your card to. It can be either card. If you see a Slide Killer card, slide your card to three more people, then die, even if you are a Slide Killer yourself.

If either a Doctor or a Villager think they know who a Slide Killer is, they may call a vote. You have thirty seconds to vote someone out. The person who called the meeting may nominate one person, and then the group as a whole votes to exile them. Each person only has one chance to call a meeting. The Slide Killer reveals themselves upon getting voted out.

The game ends if either the Slide Killers kill all of the Doctors and Villagers, The Slide Killers win, or if the Doctors and Villagers manage to vote out all of the Slide Killers, the Doctors and Villagers win.

Printing Instructions:

Print one page of cards per every five players. **Do not** print front/back. Prints for fifteen people.
