

TURVY_APPALOOSA

In general appearance the Appaloosa is symmetrical and smooth. The majority of owners want a well-muscled, full bodied horse. Practically no one desires an Appaloosa to be extremely narrow, shallow bodied and upstanding, or the extreme, wide, thick muscled and drafty. The most popular weight is from 1000 to 1100 with more preference for the 900-1000 than the 11-1200. The popular height is from 15.0 to 15.2, with more preference for the 14.2-15.0 than for the 15.2-16.0.
