EXPERIENCE

- **Trainee Software Engineer at Fendahl International** — **Feb 2025 - Present**
  Gaining hands-on experience in C#, LINQ, .NET, .NET Core, and Microsoft SQL Server. Worked on small assignments and contributed to product development, applying OOP principles and database management skills. Additionally, contributed to the development of a React Native mobile application, implementing frontend components, integrating APIs, and ensuring cross-platform functionality.
  Tech work on C#, Dot.Net, Dot.Net Core, Microsoft SQL Server, React Native, React

- **Full Stack Web Developer at Nobstash (Internship)** — **Jun 2024 - Nov 2024**
  As a Full Stack Intern at NobStash, a dynamic startup, I played a key role in developing the company's website. The platform's main idea was to sell unique or rare items and collectibles from celebrities, incorporating a bidding system to enhance user engagement. This experience allowed me to contribute significantly to both the front-end and back-end development, ensuring a seamless user experience and robust functionality.
  Tech work on ReactJs, MongoDB, Express, NodeJs, DSA

- **Frontend Web Developer at WebbyWolf (Internship)** — **Aug 2023- Feb 2024**
  Worked on multiple creative web projects, collaborating closely with designers and developers. Successfully delivered high-quality features, earning a 4-month extension for strong performance.
  Tech work on NextJs, ReactJs, Netlify, Github, React-PDF, Web Audio API, Image Js Libraries

PROJECTS

- **Carrer Canvas**

  Career Canvas is a user-friendly resume-making website. Simply enter your data and create a professional resume with multiple templates.

  Tech: Next Js | Gemini API | Tailwind | GSAP | Prisma | Typescript | Express | MongoDB

- **Spend-Wise**

  Spend Wise is the essential expense management app that simplifies tracking and categorising your transactions, helping you gain control over your finances. With a streamlined user experience, it focuses on key functionalities for users who want to start managing their expenses immediately.

  Tech: Flutter | Node Js | Express | MongoDB
