

[Techfunic](#) is an #Ed-Tech startup with a vision to democratise education by making online personalized #tutoring for kids, affordable & engaging. Ann Andrews, the founder was granted the [NYU Female Fellows Foundership](#) for her contributions to STEM education in the US. [Read our founding story on Forbes](#)

We at Techfunic, are growing strong and now looking to build our tech talent. We are seeking someone who shares our vision and has entrepreneurial acumen to join us, as a Full Stack Development Intern.

We would love to have someone who :

- Any exposure/ working knowledge in full stack software development, using NodeJS, Google Cloud and MySQL
- Pursuing Bachelors or Masters in Computer Science
- UI development experience preferred
- Self driven with a track record of meeting deadlines on time and a high level of learnability
- Problem-solving skills and the ability to think out of the box

We want you to:

- Design software solutions within the specified architectural /design guidelines.
- Develop and maintain efficient, reusable, and reliable code / database
- Analyze business requirements, create use cases and test cases
- Participate and contribute in daily scrum meetings
- Set up continuous integration environment to run test cases and then deploy from GitHub to the cloud
- Estimate development efforts for project planning and meet projected timelines
- Respond to problem escalations and resolve critical production issues

To apply, at careers page or send in CV to careers@techfunic.com

Techfunic Inc is proud to be an Equal Employment Opportunity and Affirmative Action employer.
