

# ECKERD COLLEGE

CAREER CENTER

## **Skills Mapping**

### **Instructions**

- 1) Scatter these words on a piece of paper, drawing a circle around each: major(s), minor(s), jobs, hobbies, internships, volunteering, research
- 2) Jot down experiences or skills you've gained from each of those words. Skills can include hard skills, such as GIS and Python, and soft skills, such as delegation and task management.
- 3) Consider the following questions:
  - What skills have you developed or acquired?
  - What skills stand out to you?
  - Do you notice any themes?
  - How do the skills relate to your career interests?
  - How could you talk to a potential employer about how those skills will allow you to make valuable contributions?
