Subject: Site Advisor Profile
Document ID: #4828

Data File: Site Advisor Jax Morgan

Name: Jax Morgan
Position: Site Advisor
Date of Birth: 09/09/1997
Place of Birth: Worthing
Hospital

Project Record:

Operation vents - release
coming soon
Operation restrain - Active
(Operation lead)

History:

Jax Morgan was a Businessman from England who owned a weapons manufacturer that sold weapons to countries like Russia, America and The UK. Jax started the business at 20 and signed contracts with multiple countries within the first year of production making him a Billionaire at the age of 24. He joined the foundation after they recognised his potential and his innovative and leadership skills and thought he would be a great fit for the position.

Operation Vents:

This operation will try to get NU7 and E11 to improve the security of the site and ensure that the 2 departments work together to keep CI out of the site and mainly out of HCZ. To help test how well they are at keeping people out we can use IA to go in disguise and see if they can make it from surface to a

containment chamber in HCZ without getting caught, we can also use DEA for this as well.

Operation restrain:

This operation will make sure GENSEC are trained properly and are staying in d-block especially keeping on top of the cl4 members this will involve IA to help with keeping them doing their job. To help get a greater understanding of how they are going wrong we can set things up with IA to try find flaws and more

(these operations are potential ideas that you might expect from me if i become SA)

Medical History:

Jax has a limited medical history but does have extreme anger issues that can make him very rude and easy to anger making it very hard to get on his good side but if you do you will be protected very well and it will benefit you to the greatest extent. He also because of his condition speaks his mind and is not afraid to tell anyone that their idea is 'shit' (although they are very good at hiding it).

He also does not want to believe he has this and will make sure that he does not get checked and he doesn't have to 'face reality' and realize that this is a problem.
