- **Find out where you were up to on your PROJECTS before the lockdown.**

Team Renegade:)	Team Polys:	Team Jaxxz:	Island Skittles:	DonkCorn:

We were still coping with emailing the people who didn't decide to reply.	We were ready and just about to have our first tournament but the lockdown ceased us to wait.	We managed to run 1 of our *Tamaki Drives* outside the Whare Kai. We also planned to create another one but we didn't get to running it, because of the lockdown...	We had just finished speaking to Mr Moyes and telling him all about our project. We asked him questions about his swimming programme that he runs with the year tens.	We were on our last week of Maybury Royale

Choose the 3 BEST CAPABILITIES that you think your project groups have. Say why they were the 3 BEST.

Team Renegade: 1. Communication in our group has been quite effective! Prior to lockdown, we were able to get in touch with each other and discuss matters/situation(s) that needed to be cleared. As time gradually passed, we also finally got in contact with a few people that can help shift our project to the next step. Example: If there was a team member absent, we managed to comprise and proceed with our project. 2. Contribution, everyone in our group has managed to do their	Team Polys: 1. Always Positive ideas/values/words/emotions - Across everthing our team has gone through, we've trembled among obstacles demanding us to fall apart as a group. But knowing why we are in this awesome class of intelligent kids with high expectations, we refused to turn away from our goal so we strive even harder to reach it. 2. Iteration - Our first project(s) was having multiple activities such as mentoring classes, haircuts and fun	Team Jaxxz: - We have *very good* communication towards each other, visitors, teachers and outsiders. - Each of us are able to collaborate, cooperate and work as a team, *teamwork makes a dream work* - We are also able to make things clear and clarify ideas specifically. - I know we are only supposed to do three but.. Here's a four, Everywhere we are Team Jaxxz always use their RISE values... *at all times!* - Here's another one..., As a group we all pay close attention to each other	Team 'I.S' crew: ● Confidence - We all agreed that our team is able to show confidence when sharing ideas and collaborating with other people. ● Planning - Everyone was able to contribute their ideas, and we were able to organise our scrums and tasks for the day. ● Iterate	DonkCorn: ● Communication - our communication status as a group is very effective. It took time to develop communication among ourselves but once we pulled ourselves together and communicated, we were able to communicate with people outside. ● Allocating Tasks - we often identify what needs to be done after our scrum. . ● Iterate/Iteration - Our first project launch for

part and participate. After allocating the tasks and explaining them specifically, we managed to complete them in the given time-frame. Everyone's contribution has left some sort of impact on our project - mainly positive :) 3. Staying positive, throughout this journey we came across certain obstacles that we're bound to hinder our progress. However, being the awesome team that we are, we stayed on the positive side of things, faced these obstacles and turned them into lessons that we can learn from and can help improve our road safety project. peridot pooh.	activities like those. We came through barriers nudging us to reform a new project achievable in the timeframe given. 3. Planning - Everyone was capable of contributing their ideas and improvements to benefit our project. We managed ourselves into different roles to build a "scrum" that assisted phenomenally. We also had the opportunity to work beside Tamaki Touch and ACC to help convert our project as a plan into a reality.	as we speak out or even when outsiders, teachers, visitors and other peers contribute their thoughts and ideas. During the first couple of weeks of school we didn't really pay close attention to each other, as we didn't really know each other that well because everyone in our group is from different schools. - Danielle - Glen Taylor - Chastyti - Pt England - Eden - Glen Innes - Jerome - Saint Pius X - Siosaia - Glenbrae - Heneliena - Saint Patricks		maybury royal was unexpected because it was arranged without knowing. We observed how things were going and decided to put in more work until more people attended. The community gave us feedback and we took it into action by extending our event a little longer.

● **Choose the 3 THAT YOU FEEL COULD HAVE HELPED YOUR GROUP BETTER!**

Team Renegade: ● Staying on task. Out of all the weaknesses we have in our group,	Team Polys: 1. Staying on task - 2. Multi-task - 3. Self-management -	Team Jaxxz: - During our discussion one <u>*very important*</u> ppt came	Island Skittles:	DonkCorn: ● Multi tasking ● Clarifying ideas ● Self management
--	--	---	--------------------------------	---

staying on task was what we were heavily lacking in. Though we managed to complete our assigned tasks, most of us failed to avoid distractions. This led to our team not being able to take the next step which was actioning our project and many of our set date/times for our meetings we're constantly delayed. ● Self management. Self management is all about taking responsibility for our actions, avoiding anything that will hinder our behaviour/wellbeing .It also is all about having the correct mindset throughout the entire process without being distracted. Certain people (me) ● Focussed. Staying focussed can be extremely hard for many students. It's also all about adapting to the		up. As a team we decided that *Preparation* is very important, because making up a plan along the way is not the key to succeeding in our project - based learning. Our group needs to work on setting up a plan after we have finished one thing, instead of working on two things/idea's at once. *that's what muddles us up* - Timeframe, is also another ppt that we *Team Jaxxz* have to work on. We need to learn how to set a start and finish line when it comes to planning an event. Our first *Tamaki Drive* has made us realise that timeframe is very important, otherwise we will be stuck in a very difficult situation. - Stay on task, We *team Jaxxz* need to learn how to stay on task and focus on our

correct mindset level that would keep you focussed for a good amount of time.		projects when we are in our project groups.

- What are the NEXT STEPS for your team?

Team Renegade:	Team Polys:	Team Jaxxz:	Island Skittles:	DonkCorn:
● Our next step for Team Renegade would be to keep in mind that if this project becomes very successful we may proceed in other locations. This is optional, may or may not. ● Also gaining progress with our capabilities as a group (skills) ● New project?? Please yessss maaam ● The next step is mainly actioning our project. Out of all groups, our project may be one of the quite complex ones as we are literally taking on the law!		- The next step for us as a team is to work on the three capabilities and get them on lock. We will also plan to start/plan a new project. We don't know what we are going to focus on but we will get there... * that's it* we think...
