Job wanted: a pediatric nurse practitioner at Yale Hospital

- Patience
- Responsible
- Compassionate
- Dedication

Paid Work Experience:

2022-Present Secretary For Whitney Pediatric & Adolescent Medicine
I filed medical forms for the patients, and I kept the charts up to date for when they were scheduled to see the doctor. I also answered all phone calls. This required patience and being kind and respectful over the phone and at the front desk. This will help me get the job that I want because I need to be patient when working with children. I also need to be kind and respectful when approaching parents.

2020-2021 Babysitting
As a babysitter, it was my responsibility to feed the children, bathe them, take care of their daily needs, teach them to read, and be responsible for their actions. This will help me as a pediatric nurse because I must learn to care of a child if I want to become a pediatric nurse.

2017-2018 Summer Camp Counselor
My job was to teach a group of seven year old children how to swim. Along with planning group activities throughout the day, I was also trained to administer first aid care to the children in the event of an emergency. I had to make sure they followed the daily activity schedule. This will help me as a nurse because I must be able to care for children even in emergency scenarios.

Work Experience in School:

2016-2017 Daycare
I took care of children and took care of their daily necessities; such as: feeding them, changing diapers, and giving them their medication when needed. This helps me as a nurse because I must get use to taking care of children if I want to become a pediatric nurse.

Education:

Simmons College
2019-2023
BSN, MSN

The courses I took in college were the following: Microbiology, Chemistry, Nutrition, Pediatric Nursing Practice and theory, Bioethics, Fundamentals of Microbiology, Nursing Research, Nursing Care of Older Adults and Public Health Nursing, Physical Assessment.
