

Hymn Video Timing

- Thumbnail: use Title Page
- Intro
 - 1 second fade-in
 - 1 second rest
 - Piano starts on the 3rd second
 - Title Page fades out fully at 2 seconds before the starting of the 1st verse
 - Hymn 20 example:
 - 0.9–Title Page fades out (1 second) (Use “Cross Dissolve” in Davinci Resolve?)
 - 0.10–1st verse lyrics ready
 - 0.12–1st verse music starts (2 seconds to prepare the audience before singing)
- Verse Transition
 - 2 seconds (beats) before the next verse starts, if possible. For faster hymns, change as soon as the last syllable of the current slide is sung.
 - ~~(Seems like we are not using transition between verses?) If using fade-in for transition with 2 seconds or more (may consider for transition with 1.5-2 seconds), use 0.5 second (or shorter) fade-in.~~
- Outro
 - 2 seconds rest
 - Hymn 20 example:
 - Music ends at 2.47
 - 1 second fade out at 2.49
 - 1 second fade out (Use “Cross Dissolve” in Davinci Resolve?)
 - Hymn 20 example:
 - Fade to black at 2.50
 - 2 seconds on black ((Use “Generators” to generate black color for 2 seconds in Davinci Resolve?)
 - Hymn 20 example:
 - Entire video ends at 2.52
